

Digital Balemaster

Moisture Meter for Bales

The Digital balemaster is a hand held instrument which displays the results on a large LCD Digital Display. The probe is made from strong durable stainless steel and is 600 mm long to reach the centre of big bales

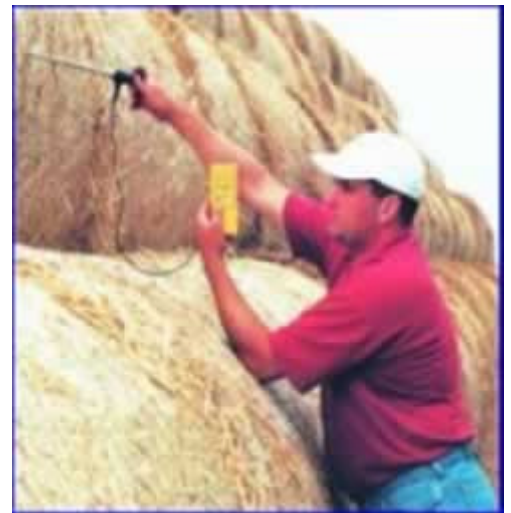

Monitoring of moisture in hay and straw during bailing and before storage is important. High levels of moisture can lead to discolouration and will support the growth of moulds and fungi.

Features

- Simple to Use
- Strong, robust stainless steel moisture probe (600 mm)
- Digital display
- Temperature probe 600 mm length also available

Technical Specifications

| | |
|--------------------|---|
| Meter dimensions: | 160 x 65 x 20 mm |
| Meter Weight: | 230 g |
| Probe Weight : | Standard : 520 g |
| Probe Dimensions: | Standard: 600 mm long x 10 mm diameter GRN6150 Moisture Probe |
| Measurement range: | 9% - 40% (guidance only above 30%) |
