

# Sagola M200 Mask

The Sagola M200 is a self-filtering paper mask for solid and liquid particles of low and medium toxicity. For use against non-ferrous metal dust, welding metal fumes, gasses and mists NOT INCLUDING materials such as lead, aluminium and manganese. The masks come with double elastic tape with flexible metallic strip for adjustment to nose area. NPF (nominal protection factor): 12 (concentration permitted in the atmosphere 12 times the TLV). The set adapts perfectly to all kinds of expressions and movements, always providing the highest possible level of protection.
