

elcometer®

industrial
spray equipment

The Elcometer range of industrial spray equipment is designed to **work harder**, **last longer** and **perform better** - to make your job easier.

1 FLUID HANDLING

- Pressure Pots & Tanks
- Pneumatic Pumps
- Transfer Pumps & Drum Covers

2 SPRAY GUNS & APPLICATORS

- Manual Spray Guns
- Automatic Spray Guns
- Specialist Applicators

3 AIR FILTRATION

- Air Purifying
- Air Treatment
- Air Heating

4 HOSES & COUPLINGS

- Anti-Static Air Hose
- Air & Product Hose
- Quick Couplings
- Connectors

5 SagolaSPRAY™ VR TRAINING

- Virtual Reality Spray Training

6 ANCILLARY EQUIPMENT

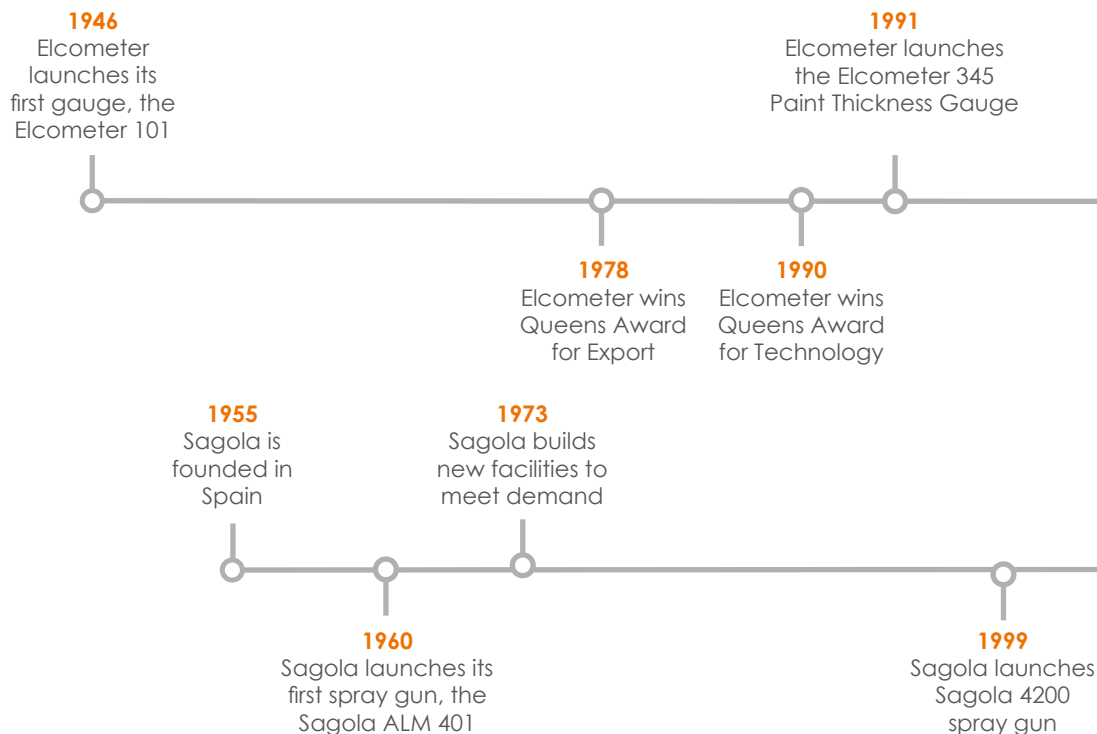

- Inspection Equipment
- Protective Clothing

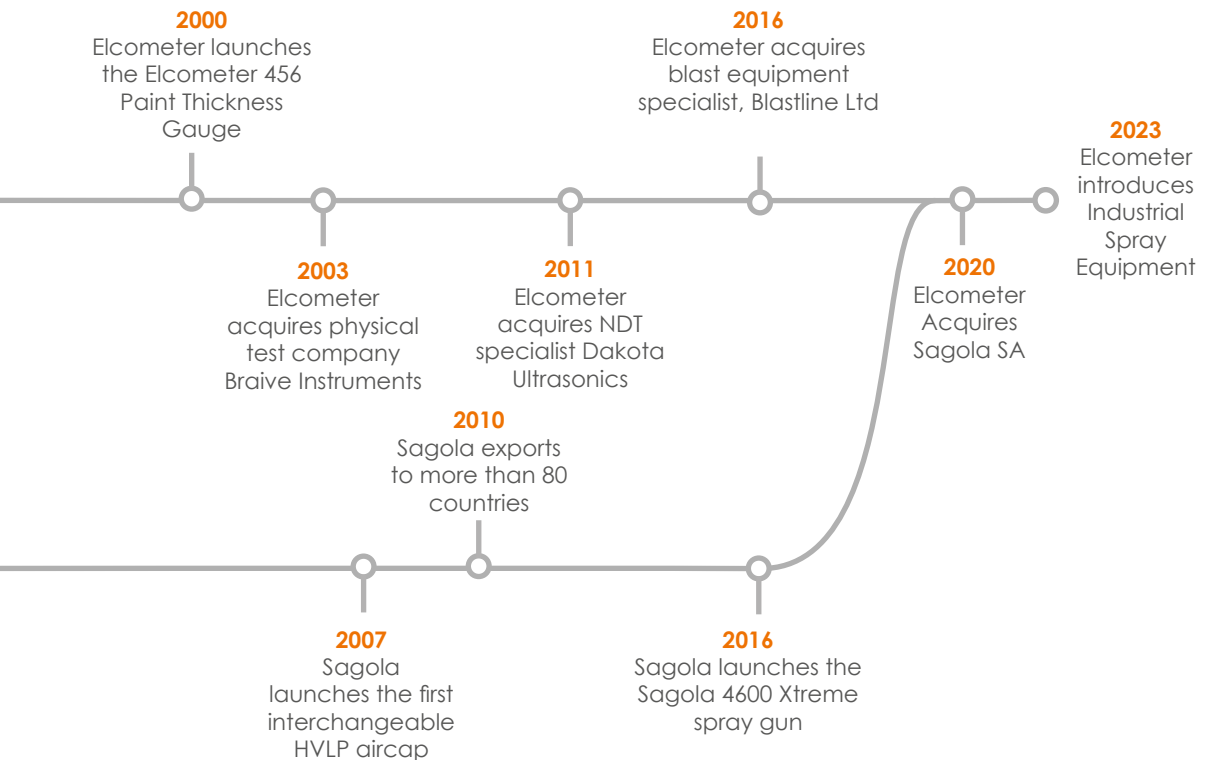

7 SPARE PARTS

- Fluid Handling
- Spray Guns
- Applicators
- Air Filtration
- Air Treatment

As one of the world leaders of inspection, blasting and NDT equipment for more than **75 years** we have **worked hard** to **be the best** at **what we do**, so you can **be the best** at **what you do**.

We are here to help ...

Supported by our Production and R&D facilities in the UK, EU & USA, we are here to support you, wherever you may be.

www.elcometer.com

www.elcometer.com

Quality is at the heart of everything we do, it's in every part we make, every manufacturing process we follow, every **service** and **support** we provide...

Quality & Reliability

Our philosophy is to integrate quality into all aspects of the product - whether it be the initial product design, the manufacture of our product or in our commitment to our customers.

We are committed to meet or exceed the expectations of our customers and stakeholders by aligning our quality objectives across our products, sales, service performance and delivery.

Technology & Expertise

From the very beginning, we have maintained the highest standards in design and product development in order to exceed the most demanding coating processes.

The knowledge and experience within our Spray Equipment Division are second to none, which is why our spray guns have some of the highest transfer efficiencies on the market today, helping you to work faster and more productively than ever.

Technical Support

We put product training and technical support at the forefront of everything we do.

Our commercial offices and technical training teams around the world are one of the cornerstones of our brand.

We believe that being here to support you is critical to your success.

After Sales & Warranty

Quality is in our heritage. We are what we are today due to the quality mindset across all our departments and facilities around the world. It is because of this commitment to quality that we offer an industry leading manufacturer's warranty;

- Every pressure pot & tank comes with a 2 year warranty*+.
- Every spray & transfer pump comes with a 2 year warranty*+.
- Every Sagola spray gun comes with a 3 year manufacturer's warranty*+.

We know that if we stand by our products, so will you.

* When the product is registered on www.elcometer.com

+ In accordance with Elcometer's Warranty Policy, for more information visit www.elcometer.com

Choosing the right technology for your Industry Sector

Quality of Finish

A high quality finish requires maximum product atomization

Air Assisted Airless Mix (AA)

Conventional (CA) & Air Spray (AS)

AR

**Automotive Refinishing

PRESSURE POTS & TANKS

Ideal for large surface areas requiring a high quality finish, Elcometer pressure pots and tanks allow a coating to be prepared and mixed in bulk quantities to ensure it is supplied to the spray gun at a consistent viscosity and fluid pressure.

Fully CE and UKCA compliant, Elcometer pressure pots are safe, reliable and easy to maintain, with no wearing parts - so you can simply focus on getting a good finish.

TECHNICAL SPECIFICATION

Tank Capacity	60 Litre (15.85 US Gal)
Agitator Type	None
Product Outlet Position	Lower outlet connection (x2)
Construction Material	Stainless Steel Body & Lid
Working Pressure (Max) ¹	7bar (101psi)
Air Inlet Connection	6.35mm (¼") BSP Male
Product Outlet Connection	9.52mm (¾") BSP Male
Air Pressure Gauge	0 - 8bar (0 - 116psi)
Product Pressure Gauge	0 - 12bar (0 - 174psi)
Operating Temperature	0-50°C (32-122°F)
Dimensions (with agitator)	880 x 880 x 1050mm (34.64 x 34.64 x 41.33")
Weight (Empty)	58kg (127.86lb)
Packing List	Elcometer P60B Lower Outlet (x2) Pressure Pot; 60 Litre (15.85 US Gal) & 11m (36 ft) Air Hose ²

Part Number	Description
PP60B	Elcometer P60B Lower Outlet (x2) Pressure Pot; 60 Litre (15.85 US Gal)
PT56414025	Anti-Static Air Hose with ¼" Female Connection: 11m (36ft)
PT56414112	Product Hose for REGULAR Products with ¾" Female Connection: 10m (36.1ft)

1. Maximum air inlet/fluid outlet pressure

2. Supplied as standard. Other lengths of hose are available - see page 1-17 for details.

Elcometer Pressure Pots & Tanks Kits

Elcometer pressure pots and tanks are available as complete kits, supplied with an extensive range of Sagola pressure fed spray guns and a combination of air and fluid hose sets to ensure you get the perfect kit to suit your application.

Choose your ideal pressure pot or tank from 2.5 litres (84.5fl oz) up to 60 litres (15.85 US Gallon).

+

Combined anti-static air & product hose with protective cover for air spray (low pressure) systems or air hose dependent on pressure tank

+

Kits are supplied complete with a range of pressure spray guns with a choice of aircap, needle and nozzle combinations to suit your application.

Ideal for continuous use the **Sagola X4100** Pressure Spray Gun provides a high quality spray, whatever the coating.

- **Ergonomic and easy to use**
perfectly balanced for comfortable use over long periods
- **Minimal maintenance**
with no seals or plastic parts in the product area it is easy to maintain
- **Interchangeable aircaps, needles & nozzles**
for high quality spray finishes

Other lengths of air and product hose are available - see page 1-17 for details.

For our range of pressure spray guns for pressure pots and tanks - see page 2-6 for details.

1. Combined Anti-Static Air & Product Hose with Protective Cover for Air Spray (Low Pressure) Systems. Air Hose (Blue): Anti-Static, EDPM with textile reinforcement, ID: 8mm x OD: 15mm with 1/4" Female Connection. Product Hose (White): Nylon (Polyamide PA12), ID: 6mm x OD: 8mm with 3/8" Female Adaptor Protective Cover (Black): Polyester. Various lengths available, see page 1-17 for more information.
2. Combined Anti-Static Air Hose (ID: 8mm with 1/4" Female Connection) & Product Hose (ID: 10mm with 1/4" Female Connection) with Protective Cover for Adhesive Products.

Elcometer Pressure Pots & Tanks Accessories

Pneumatic Agitators

Agitators are compatible with Elcometer P25T and P50T models only.

Elcometer P25T & P50T Rotary Agitator Installation Kit: For products which need to be continuously stirred to keep the mixture homogeneous:

- Air consumption: 350lpm (12.4cfm)
- Speed regulator: up to 300rpm

Elcometer P25T & P50T Oscillating Agitator Installation Kit: Makes alternate oscillating movements through 180° ideal for products which contain solid particles and need constant mixing

- Air consumption: 28lpm (1cfm)
- Speed regulator: 10-20rpm

PNEUMATIC PUMPS

Elcometer's range of professional air spray, air assisted airless and airless pneumatic pumps ensure consistent and reliable high performance for paint lines, spray booths, automated production lines and even out on site.

Designed to be durable, hard wearing and easy to service, all Elcometer Pneumatic Pumps are supplied with a 2 year manufacturer's warranty* for peace of mind.

* Elcometer Pneumatic Pumps are supplied with a 1 year warranty against manufacturing defects.
The warranty can be extended free of charge to 2 years within 60 days of purchase via www.elcometer.com

KARA 1-40

The **Elcometer KARA** pumps are a range of air operated double diaphragm pumps for conventional air spray applications. Engineered to supply high-quality coating materials for wood, plastic, metal or ceramics.

Key Features

Anti-pulse chamber with fluid mesh filter fitted as standard ensures any debris in the paint is filtered before supply to the spray gun

Fluid regulator included as standard for consistent control of fluid flow and pressure

Up to 40lpm (10.6gpm) ensures high fluid circulation to keep paint homogenous

Rugged stainless steel and aluminium pump construction to handle the most common automotive, industrial and marine paints

Aerospace grade aluminium change over valve uses metal on metal technology to prevent sticking

Air pressure regulator for regulating atomizing air to spray gun

Main system air inlet regulator – pump regulator up to 7bar

Stable footprint of 543 x 527mm

Each pump is fitted on to a rugged & ergonomic trolley with built-in hose & gun rack, for easy movement around site.

Heavy duty wheels for easy transportation

Unbolt the bracket and pump from the trolley to create a wall mounted version with suction hose - weighing up to 12.0kg (26.5lbs)

Elcometer KARA Key Features

With up to 40 litres per minute (10.6gpm) maximum free flow, the Elcometer KARA's high fluid delivery capacity delivers paint consistently whilst ensuring more than enough pulse-free flow at the nozzle, even with long fluid hoses.

SUITABLE FOR USE WITH:

Material	
Solvent Based	◀
Water Based	◀
Product

Industrial porcelain coating	◀
Ceramic tableware glaze	◀

Powerful performance

Elcometer Kara's high fluid delivery keeps paint homogenous whilst ensuring more than enough pulse-free flow at the nozzle, even with long fluid hoses up to 30m (98.4ft). In fact, with up to 40 litres per minute (10.6gpm) maximum free flow, the Elcometer Kara's high performance can supply a second spray gun.

Durable and hardwearing

Its rugged stainless steel and aluminium construction ensures the Elcometer Kara has low maintenance and a long service life.

Efficient

With an air consumption of 0.28cfm (2.09gpm) the Elcometer Kara ensures economical compressor running costs.

Versatile

Choice of suction hose or product tank, suitable for spraying solvent or waterborne coatings, primers, fillers, stains and lacquers.

Consistent paint supply with longer fluid hose sets.

Fast colour change and material refills in high production environments.

¹ 2k & 3k coatings with a pot life of 30 minutes at ambient temperatures of 24°C/75°F are not advised to be used with Kara 1-30 and 1-40 supply pumps

Elcometer **KARA** Packages

The Elcometer KARA range is available as a package which includes fluid regulator, filter, air regulation and hose kits, complete with a choice of Sagola pressure fed spray guns.

The range of Elcometer Kara pumps are available wall or trolley mounted supplied with a fluid regulator and suction hose as standard. Hoppers can be purchased separately.

7.5m (24.6ft) Combined Anti-Static Air & Product Hose with Protective Cover for Air Spray (Low Pressure) Systems

The Elcometer Kara is ideal for use with low pressure fed spray guns such as the Sagola X4100 and Sagola X4100 Ceramic spray gun, the Sagola Mini Xtreme and the Sagola 3300 GTO

Ideal for high production use the **Sagola X 4100 Series** Pressure Spray Gun offers a high quality spray, whatever the coating.

- **Ergonomic and easy to use**
perfectly balanced for comfortable use over long periods
- **Minimal maintenance**
with no seals or plastic parts in the product area it is easy to maintain
- **Interchangeable aircaps, needles & nozzles**
for high quality spraying, whatever the coating

Elcometer **KARA** Accessories

BALTIC 32

ELCOMETER BALTIC

AIR ASSISTED
AIRLESS PUMPS

RATIO

15:1

30:1

32:1

COMPLIANCE:

ATEX  2 II GX

Ideal for wood & metal workshops the **Elcometer BALTIC** is an air assisted airless (mix) pump designed to be durable and easy to maintain, engineered and manufactured with high quality components such as stainless steel balls and tungsten carbide seats.

Key Features

Low air consumption air motor, 1.10cfm (31.12lpm) maximum

Robust, easy to read gauges for both pump & spray gun

Precision pump & spray gun regulators

Anti-pulse chamber, compatible with waterborne & solvent based products, with stainless steel 80 mesh filter helps to prevent spray tip blockages and ensures smooth spraying

Easily accessible wet cup for throat seal pump liquid

Rugged, durable pump with tungsten carbide and stainless steel ball & seats and self-adjusting packings

Service the lower quickly using standard workshop tools

Stable, boltable footprint of 543mm x 527mm

Each pump is fitted on to a rugged & ergonomic trolley with built-in hose & gun rack, for easy movement around site

Unbolt the bracket and pump from the trolley to create a wall mounted version with suction hose - weighing up to 12.3kg (27.1lbs)

Elcometer **BALTIC** Key Features

The **Elcometer BALTIC** is an air-assisted airless piston pump which applies paints by air assisted spraying, ideal for wood workshops or metal fabricators requiring a high quality finish at fast application rates.

IDEAL FOR USE WITH:

Easy to use and maintain

Engineered to be simple to use, the Elcometer Baltic's robust self-adjusting packing & seal kit, filter, balls and seats are fast to service or replace - reducing maintenance time.

High performance

The Elcometer Baltic is available with 15:1, 30:1 and 32:1 ratios, allowing larger spray tips up to 0.45mm (0.018"), better fan patterns, longer fluid hoses and less pulsing for a better finish.

Efficient and quiet

The low air consumption of the Elcometer Baltic helps to lower expensive compressor running costs, whilst the low noise makes it ideal for production lines.

Versatile

Choice of trolley or wall mounted with a suction hose or gravity fed hopper, pair with the Sagola Mini Xtreme Mix Spray Gun to suit your application.

Multiple particle filters within the system: in the suction hose, pump filter and on the spray gun.

Easy and fast to maintain.

Fast colour changes & low material wastage.

Elcometer **BALTIC** Packages

The Elcometer BALTIC air assisted airless range is available as a complete kit with the Sagola Mini Xtreme Mix spray gun, fluid regulator and product & air hose kit.

The range of Elcometer Baltic pumps are available wall or trolley mounted supplied with a fluid regulator and suction hose as standard. Hoppers can be purchased separately.

7.5m (24.6ft) Combined Anti-Static Air & Product Hose with Protective Cover for Air Spray (Low Pressure) Systems.

Sagola Mini Xtreme Mix Pressure Spray Gun with a choice of spray tips to suit your application.

Favoured by professional french polishers for its quality finishes, the **Sagola Mini Xtreme Mix** Air Assisted Airless Spray Gun is incredibly light and ergonomic, ideal for demanding workshops.

- **Ideal for continuous use**
lightweight and comfortable for use over long periods
- **Robust and durable**
tungsten carbide tip inserts with stainless steel fluid nozzles
- **Easy to use**
with 1/4" high pressure fluid hose swivel

COMPLIANCE:

ATEX  2 II GX

RIGA V25

The gentle pumping action of the Elcometer RIGA V air assisted airless pump, with its vertical bellows - combined with reduced sealing surfaces, provides excellent fluid handling and supply of shear-sensitive materials, including UV coatings and waterborne materials.

Key Features

- Low air consumption air motor 0.86cfm for improved efficiency and low running costs
- Anti-pulse fluid filter fitted as standard ensures consistent spraying
- Rugged stainless steel and aluminium pump construction handles a wide variety of fluid types
- Smooth bellows action for uniform paint flow, engineered for use with sheer sensitive coatings
- No exposed seals or packing reduces maintenance or contamination
- Easy to flush through for fast colour changes
- Fluid and air regulator included as standard for consistent control of fluid & air pressure

- Fewer working parts to replace, enhanced reliability and less down time
- Each pump is fitted on to a rugged & ergonomic trolley with built-in hose & gun rack, for easy movement around site
- Unbolt the bracket and pump from the trolley to wall mount
- Wall mounted with suction hose only 12kg (26.5lb)

25:1

COMPLIANCE:

ATEX  2 II GX

Multi spray gun feeding capabilities, the powerful Elcometer RIGA H is an air assisted airless horizontal bellows pump with a smooth bellows action for uniform material flow. Thanks to its closed pump design and leak proof system, there is no air or moisture contamination - ideal for moisture sensitive coatings.

Key Features

Elcometer RIGA H25

Low maintenance 59cfm (16.71lpm) air motor for large automated paint lines

Pump fluid section manufactured from stainless steel to handle solvent & waterbased coatings

High flow 9.75lpm (2.58gpm) engineered to supply multiple guns

Smooth bellows action for uniform paint flow, engineered for use with sheer sensitive coatings

Anti-pulse fluid filter fitted as standard ensures constant spray pattern and uniform film thickness

Fluid and air regulator included as standard for consistent control of fluid & air pressure

No exposed seals or packing reduces maintenance or contamination

Each pump is fitted onto a rugged & ergonomic trolley with built-in hose & gun rack, for easy movement around site

Unbolt the bracket and pump from the trolley to wall mount

Elcometer RIGA H25 weight complete with suction hose: 33.3kg (58lb)

Elcometer RIGA Key Features

Precision engineered and designed for handling of shear sensitive, moisture-sensitive materials and UV coatings, the Elcometer RIGA range is ideal for automated paint lines where performance, reliability and coating stability matter most.

IDEAL FOR USE WITH:

Smooth internal paint flow

Ideal for flat bed coating systems, the gentle bellows action of the Elcometer Riga pump prevents paint bubbling of sheer sensitive materials such as varnishes UV-cure coatings, high-solid waterborne and solvent based materials.

Durable and reliable

With minimal working parts to replace, the tough stainless steel and aluminium construction of the Elcometer Riga provides long-lasting durability with minimal maintenance, even for highly demanding materials.

Enclosed bellows system

The Elcometer Riga ensures no air or moisture contamination - ideal for moisture sensitive coatings even when if it fails, thanks its closed system with no exposed seals or packing.

Easy to use and maintain

Elcometer Riga bellows pumps are easy to operate and simple to maintain.

Enclosed bellows packing system to prevent contamination

Supply multiple guns on flat bed coating systems

Elcometer **RIGA** Packages

The Elcometer RIGA range is available as a complete kit with the Sagola V7 MIX Automatic Spray Gun, fluid regulator, filter and product & air hose kit.

The range of Elcometer Riga pumps are available wall or trolley mounted supplied with a fluid regulator and suction hose as standard. Hoppers can be purchased separately.

7.5m (24.6ft) Combined Anti-Static Air & Product Hose with Protective Cover for Air Spray (Low Pressure) Systems.

Sagola V7 Mix Automatic Air Assisted Airless Spray Gun with a choice of aircap, needle and nozzle combinations to suit your application.

Designed to reduce mist and improve work conditions, the **Sagola V7 Mix** Air Assisted Airless Automatic Spray Gun has high open and close rates, ideal for use with paint reciprocating systems and robotic paint arms and systems.

- **Large open fluid passages**
tungsten carbide product seating mechanism, ideal for use with robots and specialist machinery
- **Transfer efficient**
ensures minimal mist, lowering pollution, reducing product costs
- **Fast application speed**
ideal for lacquers, clearcoats, UV paints etc.

Elcometer **RIGA** Accessories

Combined Air & Product Hose

Combined Air & Product Hose with Protective Cover for Air Assisted Airless Systems.

Air Hose (Blue): Polyurethane, ID: 6mm x OD: 8mm (compatible with 8mm quick connector).

Product Hose (Blue): ID: 4mm x OD: 10.4mm with ¼" Female Adaptor
Protective Cover (Black): Polyester.

Part Number	Description
PT56414036	Combined Air & Product Hose with Protective Cover; 7m (22.9 ft)
PT56414037	Combined Air & Product Hose with Protective Cover; 11m (36.1ft)

Sagola Mini Xtreme Mix

Sagola Mini Xtreme Mix with 8mm Quick Connect Air Coupling and ¼" Swivel Product Coupling. For more information see page 2-20.

Part Number	Description
PG35130202	Sagola Mini Xtreme Mix with 8mm Quick Connect Air Coupling and ¼" Swivel Product Coupling, with Air Assisted Airless Spray Tip 11/40: 0.011"/0.28mm, 40 Degree

Airless

ELCOMETER TYPHOON AIRLESS PUMP

RATIO

32:1

AL

AR

FF

IF

IP

COMPLIANCE:

ATEX  2 II GX

Ideal for metal fabricators applying shop primer, epoxy and other protective coatings, the 32:1 ratio **Elcometer TYPHOON** is an affordable airless pump with an excellent cost of ownership.

Key Features

Low air consumption 1.03cfm (29.3lpm) and low maintenance air motor.

Protective air motor housing made from high grade polymer.

Anti-pulse chamber, compatible with waterborne & solvent based products, with stainless steel 80 mesh filter prevents tip blockages and ensures smooth spraying

Rugged, long lasting pump with tungsten carbide and stainless steel ball and seats

Easily accessible high pressure dump valve ensures fast material change over and easy pump cleaning.

360° movable inlet fitting for easy access to paint drum

Fluid and air regulator for consistent control of fluid & air pressure

Floor locking plates for static use

Ease of manual handling, less than 11.8kg (26lb) wall mounted or only 24kg (53lb) complete with trolley and suction hose or hopper options.

Easy to access wet cup for monitoring throat seal lubricant

Each pump is fitted onto a rugged & ergonomic trolley with built-in hose & gun rack, for easy movement around site.

Unbolt the bracket and pump from the trolley to wall mount.

Elcometer TYPHOON Key Features

Designed to be hard-wearing, easy to maintain with low servicing costs, the Elcometer TYPHOON airless pump is efficient, powerful and reliable.

IDEAL FOR USE WITH:

Material	
Solvent Based	▶
Water Based	▶
Product	
1K Epoxy Coats	▶
Shop Primer Coats	▶
Inorganic Zinc Primers	▶
100% Volume Solid Epoxy Coatings	▶
Anti-Fouling Marine Coatings	▶
Solvent Based Epoxy Coatings	▶
Solvent Based 1K Polyurethane Coatings	▶
Solvent Based 2K (pot life 1 hour and above)	▶
Flame retardant barrier coats (Class B)	▶

Efficient performance

Engineered for high product output yet low air consumption - 1.03cfm (29.3lpm), the Elcometer Typhoon helps to lower expensive compressor running costs and improve performance.

User friendly

Sturdy yet compact the Elcometer Typhoon is not only easy to manoeuvre around site, it has a 360° movable inlet fitting for easy access to the paint drum.

Easy to maintain

Designed with easy access high pressure dump valve, wet cup and lower- serviceable with standard workshop tools the Elcometer Typhoon is fast and easy to maintain.

Versatile

Choice of suction hose or product tank, suitable for applying primers, epoxy and other protective coatings.

Movable 360 inlet fitting for easy access to paint drum.

Durable design for the toughest environments.

Available with an optional hopper for easy filling.

ELCOMETER HUDSON

TRANSFER PUMPS

RATIO

1:1

AR

FF

IF

IP

COMPLIANCE:

ATEX  2 II GX

The **Elcometer HUDSON** is a stainless steel piston transfer pump engineered to transfer solvent and water based fluids with a particle size of up to 5mm (0.2").

Key Features

Elcometer HUDSON Key Features

Designed to handle a broad range of water and solvent based materials, from hot to high viscous fluids or corrosive liquids, the Elcometer HUDSON's high flow rate and immersed inlet makes it ideal for priming fluids.

IDEAL FOR USE WITH:

Material	
Solvent Based	▶
Water Based	▶
Product	
Antifreeze	▶
Windshield Washer Liquid	▶
Motor Oil	▶
Used Oil	▶
Hydraulic Fluid	▶
Water based Inks	▶
Oil-based materials	▶
Solvent-based materials	▶
Water-based materials	▶
Inks and Dyes	▶

Powerful performance

With up to 60 litres per minute (18.73gpm) maximum free flow, the Elcometer Hudson is the ideal stick pump to transfer most types of hot or cold, viscous or corrosive liquids.

Durable and hardwearing

The Elcometer Hudson is a very low maintenance pump with hardwearing components such as the PTFE carbon and stainless steel packing seal kit, making it incredibly durable and long lasting.

Efficient

Designed with low air consumption, the Elcometer Hudson helps to lower expensive compressor usage costs.

Safe

The Elcometer Hudson conforms to ATEX Zone 2 ensuring it is safe for use in potentially hazardous Zone 2 areas.

Durable design for the toughest environments.

Available with drum lid and rotary agitator.

KARA 40

AR

FF

IF

IP

COMPLIANCE:

ATEX  2 II GX

Ideal for use with water and solvent based materials, the **Elcometer KARA** double diaphragm transfer pumps are engineered to quickly and consistently supply fluid smoothly.

Key Features

KARA 40

40lpm (10.6gpm) fluid delivery capacity

Versatile front and top fluid outlets for ease of use

Low pulsing air distribution manifold uses durable metal to metal technology to prevent pump stalling

KARA 40 supplied with Polypropylene seats and PTFE balls for water based and solvent materials

Durable lightweight anodized aluminium pump housing

Fast and easy to service on site using standard tools to reduce downtime

KARA 40A Abrasive Transfer Pump is supplied with stainless steel balls and seats to suit ceramic based materials

KARA 30

Versatile front and top fluid outlets for ease of use

Stainless steel balls and seats for water based and semi viscous materials

Modular air valve provides smooth and rapid changeover for increased efficiency and minimised down time.

Durable lightweight anodized aluminium pump housing

Lightweight, anti-corrosive Polyethylene (LDPE) centre housing

Available with 200 litre (44 gallons) drum lid and rotary agitator

Elcometer KARA Key Features

With high 30-40 litres (6.6-8.8 gallons) per minute fluid delivery capacity, a smooth air change over valve and aluminium, stainless steel & PTFE polyamide construction Elcometer KARA transfer pumps are built to last.

IDEAL FOR USE WITH:

Material	
Solvent Based	▶
Water Based	▶
Product	
KARA 30 & KARA 40	
Single component (1k) epoxies	▶
Single component (1k) polyurethanes	▶
Plural (2k) & multi-component (3k) low viscose polyurethane epoxies ¹	▶
Water based enamel coatings	▶
Solvent-based primer and base coats	▶
Quick air dry enamel coatings	▶
Metallic-based epoxy coatings	▶
Wood stains	▶
High solid pre-catalysed lacquers	▶
Acid-catalyst wood lacquers	▶
Waterborne lacquers	▶
UV curable epoxies	▶
Water based UV coatings	▶
1k fire-retardant coatings	▶
Natural wood oils	▶
Antimicrobial lacquers	▶
Sealers and undercoats	▶
KARA 1-40A	
Inorganic zinc coatings	▶
Stove enamels	▶
Graphene-based materials	▶
Water based ceramic glaze coatings	▶
Abrasive coatings for cosmetic & glass	▶
Vitreous enamel	▶
Vitreous sanitaryware glaze	▶
Industrial porcelain coating	▶
Ceramic tableware glaze	▶

Powerful performance

With up to 40 litres per minute maximum free flow, the Elcometer Kara's powerful fluid circulation keeps paint homogenous whilst ensuring pulse-free material flows to the application points, even with long fluid hoses. In fact, the Elcometer Kara's high performance can support multiple spray guns at once.

Robust

Rugged stainless steel and aluminium construction to handle a wide variety of fluid types.

Excellent cost of ownership

Designed with low air consumption, the Elcometer Kara helps to lower expensive compressor running costs.

Versatile

Whether you are working with water based, solvent based or abrasive materials there is an Elcometer Kara Transfer Pump available with optional drum lid and rotary agitator to suit your requirements.

Low air consumption to reduce compressor costs.

Available with drum lid and rotary agitator.

With over 65 years of design and engineering excellence, Elcometer's range of manual and automatic Sagola spray guns are designed to perform better, give value for money and be incredibly easy to maintain.

Engineered for quality & performance, our guns - with interchangeable aircaps, needle and nozzle kits - are simple to set up, fast to maintain, easy to spray with and provide consistent, high quality results.

- **Interchangeable needles, nozzles & aircaps**
for high quality spray, whatever the coating
- **3 Year warranty & almost maintenance free**
no internal or exterior gaskets
- **Engineering excellence**
every product is quality tested before it leaves the factory

Sagola has a gun, aircap, needle and nozzle combination to ensure a high quality and consistent finish - whatever your budget.

1. Choose your spray gun type

Your choice of spray gun should be based on the gun (gravity, suction or pressure - manual or automatic) and the paint type. The paint types compatible with each model can easily and quickly be identified using the key on the main product page with further, detailed information on the technical specification pages.

2. Select your spray gun model

Choose from our top of the range **Sagola X 4100**, the **Sagola Mini Xtreme** or **Sagola V4000** which offer the highest quality spray with industry leading transfer efficiencies.

3. Choose your aircap

Based on the coating, primer or filler type and method of application choose your aircap. There are two different types of aircaps; High Transfer and Conventional. Each aircap has specific air consumption requirements needed to operate effectively, this must be considered when making your selection - details can be found on the technical specification pages.

- High Transfer (HVLP); primarily used for low viscosity paints and fluids, typically used in automotive refinishing
- Conventional (CA); ideal for high viscosity paints and fluids, where a higher spray quantity is required, typically used in industrial refinishing applications

4. Select your needle & nozzle size

Based on the desired flow rate and the viscosity of the coating product;

- the larger the orifice, the greater the volume of product applied;
- the higher the viscosity of the product, the larger the orifice required to achieve a smooth, consistent flow

Ergonomic, robust and offering an unbeatable finish quality - engineered for the most demanding industrial spraybooth

SAGOLA X 4100

PRESSURE SPRAY GUN

AS

Fast paint application.

- **Ergonomic and easy to use**
perfectly balanced for comfortable use over long periods
- **Engineering excellence**
metal on metal technology - minimal maintenance required
- **Interchangeable aircaps, needles & nozzles**
for high quality spraying, whatever the coating

COMPLIANCE:
ATEX  2 II GX
(Directive 2014/34/EU)

Key Features

Ideal for continuous use the **Sagola X 4100 Series** Pressure Spray Gun offers a high quality spray finish.

Small, light and easy to use

To reduce fatigue and improve usability the size and weight of the Sagola X 4100 has been reduced and the centre of gravity optimised to make it more comfortable to use.

Metal on metal seating

No gaskets, rubber or plastic parts on product area.
Designed without air diffusers. Easy to maintain and clean.

High transfer aluminium aircaps

With a range of aircaps to fit any spraying need, the durable anodized aluminium aircaps are corrosion resistant - ideal for harsh environments.

Versatile - one gun does it all

You can use any aircap with any nozzle. So if you need to increase your nozzle size, change your nozzle and keep your aircap. You can also change your aircap and keep your nozzle.

Turn your Sagola X 4100 into a HVLP spray gun by changing suitable aircap and the needle/nozzle to suit your application.

Ergonomic, small and lightweight, only 645g (1.42lbs).

Metal on metal technology.
Manufactured without gaskets or seals in product area.

Sagola X 4100 Series Explained

Sagola X 4100

TECHNICAL SPECIFICATION

Part Number	Description
Dimensions	20 x 17 x 4.2cm (7.87 x 6.7 x 1.65")
Weight (with Filter Holder)	645g (1.42lbs)
Air Inlet Couplings	6.35mm (1/4") BSP Male
Product Filter	80 Mesh
Product Inlet Coupling	9.5mm (3/8") BSP Male
Design Pressure	8bar (116psi)
Working Pressure	2 - 3bar (29 - 43.5psi)
Sound Pressure Level (Average)	80 dB
Compliance	ATEX II 2G x (Directive 2014/34/EU)
Ordering Information	See page 2-13

Consistent quality finish guaranteed

- 1 Interchangeable stainless steel nozzles for optimum paint flow, fast and smooth application
- 2 Interchangeable colour coded aluminium aircaps available in high transfer Conventional (CA) and HVLP, perfect for colour matching and finish for basecoats, clearcoats and single stage paints.
- 3 There are no metallic or plastic external parts used for air distribution, making cleaning easier.
- 4 High precision “soft flow” air valve allows accurate set up of air pressure without wasting paint.

Low maintenance

- 5 Manufactured without gaskets or seals in product area. No air diffusers, blind chambers or threads in contact with the paint/product/material. Just metal in contact with metal, making it easy to clean and maintain.

- 6 One piece automatic paint packing gland minimising potential damage or breakage and easier to remove when cleaning the gun.

Making the spray painter's job easier

- 7 Anodized forged aluminium body; ergonomic, light and perfectly balanced. Great robustness and high protection against corrosion.
- 8 Ergonomically designed stainless steel trigger reducing operator discomfort and fatigue.
- 9 Product regulator. Great sensitivity in adjusting the amount of material to apply.
- 10 Optional filter holder with swivel coupling, see page 2-13 for more information.

Patents and Registered Designs
07380321.5, 08380132.4, 3.300.029

Sagola X 4100 Aircaps, Needle & Nozzle Kits

With high **product transfer efficiency** giving better coverage to save paint and time, the **Sagola X Series Aircaps** offer one of the **highest performances** and **lowest air consumption** in their category.

1.40 (1.40mm)	Primer and Fillers	2.0 - 2.5bar (29 - 36psi)	2.0 - 2.5bar (29 - 36psi)	380lpm (13.42cfm)	18 - 20cm (7 - 7.9")

X SERIES XT03 High Volume Low Pressure (HVLP) Aircap

For high volume and low pressure applications - ideal for basecoats or washprimers.

Nozzle	Ideal for use with:	Working Pressure Range	Typical paint pressure	Air Consumption at 2bar (29psi)	Application Distance
1.00 (1.00mm)	Basecoats	1.8 - 2.2bar (26 - 32psi)	0.5 - 1.0bar (7 - 14.5psi)	460lpm (16.24cfm)	12 - 15cm (4.7 - 5.9")
1.20 (1.20mm)	Washprimers	2.0 - 2.5bar (29 - 36psi)	1.0 - 1.5bar (14.5 - 22psi)	460lpm (16.24cfm)	12 - 15cm (4.7 - 5.9")

The Sagola X 4100 Series Aircap range consists of high transfer conventional (CA) and HVLP aircaps for perfect colour matching and finish for basecoats, clearcoats and one coat systems.

 X SERIES 3030 Conventional (CA) Aircap Ideal for primers and fillers					
Nozzle	Ideal for use with:	Working Pressure Range	Typical paint pressure	Air Consumption at 2bar (29psi)	Application Distance
1.20 (1.20mm)	Primer and Fillers	2.0 - 2.5bar (29 - 36psi)	1.0 - 2.0bar (14.5 - 29psi)	514lpm (18.15cfm)	12 - 15cm (7 - 7.9")
1.40 (1.40mm)	Primer and Fillers	2.0 - 2.5bar (29 - 36psi)	1.0 - 2.0bar (14.5 - 29psi)	514lpm (18.15cfm)	12 - 15cm (7 - 7.9")

 X SERIES 777 Conventional (CA) Aircap Ideal for clearcoats and single stage					
Nozzle	Ideal for use with:	Working Pressure Range	Typical paint pressure	Air Consumption at 2bar (29psi)	Application Distance
1.00 (1.00mm)	MS Clearcoats	2.0 - 2.5bar (29 - 36psi)	0.8 - 1.5bar (11.6 - 22psi)	345lpm (12.18cfm)	18 - 20cm (7 - 7.9")
1.20 (1.20mm)	HS Clearcoats UHS Clearcoats Single Stage	2.0 - 2.5bar (29 - 36psi)	0.8 - 1.5bar (11.6 - 22psi)	345lpm (12.18cfm)	18 - 20cm (7 - 7.9")

 X SERIES 765 Conventional (CA) Aircap Ideal for basecoats and primers					
Nozzle	Ideal for use with:	Working Pressure Range	Typical paint pressure	Air Consumption at 2bar (29psi)	Application Distance
1.00 (1.00mm)	Basecoats	1.8 - 2.5bar (26 - 36psi)	0.5 - 1.0bar (7 - 14.5psi)	315lpm (11.12cfm)	18 - 20cm (7 - 7.9")
1.20 (1.20mm)	Basecoats	1.8 - 2.5bar (26 - 36psi)	0.5 - 1.0bar (7 - 14.5psi)	315lpm (11.12cfm)	18 - 20cm (7 - 7.9")
1.40 (1.40mm)	Washprimers	2.0 - 2.5bar (29 - 36psi)	1.0 - 1.5bar (14.5 - 22psi)	315lpm (11.12cfm)	18 - 20cm (7 - 7.9")

 X SERIES 20A Conventional (CA) Aircap Ideal for primers and fillers					
Nozzle	Ideal for use with:	Working Pressure Range	Typical paint pressure	Air Consumption at 2bar (29psi)	Application Distance
1.80 (1.80mm)	Adhesives	2.0 - 2.5bar (29 - 36psi)	1.0 - 2.0bar (14.5 - 29psi)	430lpm (15.2cfm)	18 - 20cm (7 - 7.9")

Sagola X 4100 Ordering Information

The **Sagola X 4100 Series** is available to purchase as a complete kit with the aircap, needle and nozzle specified supplied and fitted.

Alternatively, as the spray gun is universal it can be used with any of the aircaps in the Sagola X 4100 Series, all items can be purchased separately to meet your specific requirements.

With improved ergonomics and ideal for a wide range of applications, the Sagola 3300 GTO offers high performance.

SAGOLA

3300 GTO

PRESSURE SPRAY GUN

AS

Application of primers and basecoats.

- **Minimum parts**

Single axis system, one single piece automatic packing gland

- **Easy to clean and maintain**

Designed with built-in air distributor. No joints between air and product. Just metal in contact with metal

- **Application**

High performance and atomization

COMPLIANCE:

ATEX  2 II GX
(Directive 2014/34/EU)

Large fan width in a lightweight, compact, ergonomic gun, ideal for hard to reach areas - all day, everyday.

SAGOLA

MINI XTREME

PRESSURE SPRAY GUN

AS

The perfect spray gun for restricted areas.

- **Ideal for continuous use**
lightweight and ergonomic for comfortable use over long periods
- **Low maintenance**
no gaskets, seals or plastic parts, just metal on metal technology
- **Interchangeable aircaps, needles & nozzles**
for high quality spraying, whatever the coating

COMPLIANCE:
ATEX  2 II GX
(Directive 2014/34/EU)

Key Features

Its compact size makes this gun the perfect choice to work in difficult to access areas. Ideal for spot repairs lettering or complex surface areas.

Small & lightweight

Medium sized spray gun, smaller and lighter than any pressure fed gun on the market, its reduced dimensions make it incredibly agile, ideal for spraying parts with complex surfaces.

Metal on metal seating

No gaskets, rubber or plastic parts on product area. Designed without air diffusers. Easy to maintain and clean.

Metal on metal technology for minimal maintenance.

Huge fan width & fast application

Supported by a pressure pot or a double diaphragm pump, this small gun is able to reach outstanding levels of product flow in huge fan patterns of more than 40cm (15.7").

High transfer aluminium aircaps

Wide range of high transfer aluminium aircaps to fit your spraying needs.

Ideal combination with a 10 litre pressure pot.

Versatility

Its wide range of interchangeable aircaps and nozzles makes it suitable for any industrial bodyshop work. From finishes to design lines or lettering.

Conventional, EPA Compliant & HVLP Aircaps

Sagola Mini Xtreme Aircaps, Needle & Nozzles

The **Sagola Mini Xtreme** is available to purchase as a complete kit with the aircap, needle and nozzle specified supplied and fitted.

AL

Tough, lightweight, forged and anodized aluminium BODY for anti-corrosion.

Safety lock

Stainless steel, four-finger trigger for greater comfort and reduced fatigue.

Easy to access gun filters available in 50 to 200 mesh grades

Smooth-Glide swivel for easier gun movement under high pressure

- **Tough, corrosion resistant**
forged, anodized aluminium body with tungsten carbide needle closures & seats
- **Low maintenance**
no gaskets, seals or plastic parts, just metal on metal technology
- **Ergonomic & easy to use**
incorporates a 1/4" revolving coupling and filter holder

COMPLIANCE:

2006/42/CE
ATEX  2 II GX
(Directive 2014/34/EU)
IIB T3 x
UNE-EN ISO 80079-36:20

TECHNICAL SPECIFICATION

Model	Sagola PSAM 500		
Dimensions	172 x 19 x 182 mm (6.78 x 0.75 x 7.18")	Weight	510g (1.1lbs)
Product Inlet Coupling	6.35mm (¼") BSP Male		
Product Filter	White (50 Mesh); Yellow (100 Mesh); Red (200 Mesh)		
Maximum Working Pressure	500bar (7,252psi)		
Average Sound Pressure Level	80 dB		
Materials in contact with product	Anodized aluminium, chromed aluminium, POM, INOX, Teflon and Nylon		
Compliance	2006/42/CE, ATEX II 2G, IIB T3 x' UNE-EN ISO 80079-36:20, UNE-EN ISO 12100:2012, EN12621, EN12162 & EN 1127-1		
Packing List	Spray Gun Product Filter 100 Mesh (Yellow x1), Reversible Airless Spray Tip Guard & GRACO RAC Tip Adapter. Airless Spray Tip not included.		

PART NUMBERS

Part Number	Description
PG30170111	Sagola 500 PSAM Airless Pressure Spray Gun
PT30010018	Sagola 500 PSAM Product Needle & Nozzle Kit (including washers)

ACCESSORIES & SPARES

Part Number	Description
PT30010008	Spray Gun Product Filter (White) 50 Mesh, Pack of 10
PT30010009	Spray Gun Product Filter (Yellow) 100 Mesh, Pack of 10
PT30010010	Spray Gun Product Filter (Red) 200 Mesh, Pack of 10
PT81461101	Reversible Airless Tip Spray Guard
PT56418698	Fixed Airless Tip Spray Guard
PT49000353	Sagola 500 PSAM GRACO RAC Tip Adapter
PT30010207	Airless Spray Tip Cleaning Needles, Pack of 12
PT40000086	Spray Gun Cleaning Kit
PT56418589	Lubricating Grease, 100ml
PT30990371	Sagola 104 & 107 PSAM Angular Head <i>Compatible with the Sagola PSAM 104 & 107, the spray tip is fitted to the angular head which is attached to the product outlet. The angular head can be turned up to 90 degrees ideal for painting insides tubes / pipes and difficult to access areas.</i>

Product filters available from 50 to 200 mesh.

For a complete list of spares / replacements parts - see Section 7 Spare Parts.

For the full range of Airless Reversible
& Fixed Tips, see page 2-30

High pressure spray gun ideal for use with all types of low, medium and high viscosity products up to 450bar (6,527psi)

SAGOLA 107 PSAM

AIRLESS PRESSURE SPRAY GUN

450bar (6,526psi)

AL

Ideal for vitreous ceramics using abrasive products

- **Ideal for continuous use**
lightweight and comfortable for use over long periods
- **Robust and durable**
seats and closures manufactured in tungsten carbide
- **Easy to use**
incorporates a 1/4" revolving coupling and filter holder

COMPLIANCE:

SAGOLA X 4100

GRAVITY SPRAY GUN

CA

Ergonomic, robust & offering a high quality finish:

- Designed for use in large scale industrial spray booths
- Ergonomically balanced, for continuous all day use
- Metal on metal technology - minimal maintenance required

COMPLIANCE:

ATEX  2 II GX
(Directive 2014/34/EU)

Key Features

Ideal for industrial components or large scale coachwork, the **Sagola X 4100** by Elcometer, has been designed for high production industrial spray booths.

Small, light and easy to use

To reduce operator fatigue and improve usability the size and weight of the new Sagola X 4100 has been reduced, compared to the old design and the centre of gravity altered to make it more comfortable.

Reduction of size; Weight reduction and ergonomic improvement.

Metal on metal contact

No gaskets, rubber or plastic parts on product area. Designed without air diffusers. Extremely easy to maintain and clean.

High transfer aluminium aircaps

Wide range of high resistance aluminium aircaps. HVLP and conventional (CA) models to fit your spraying needs.

Metal on metal technology. Manufactured without gaskets or seals in product area.

Versatile - one gun does it all

You can use any aircap with any nozzle. So if you need to increase your nozzle size, change your nozzle and keep your aircap. You can also change your aircap and keep your nozzle.

Turn your Sagola X 4100 into an HVLP spray gun by changing the aircap.

Maximum speed of application.

The Sagola X 4100 is supplied with a Reusable Plastic Gravity Cup. For a full range of Disposable Cup Systems see page 6-6.

Sagola X 4100 Explained

TECHNICAL SPECIFICATION

Model	Sagola X 4100
Cup Capacity ¹	650ml (22fl oz)
Cup Type	Removable Anti-Drip System
Air Inlet Couplings	6.35mm (1/4") BSP Male
Paint Filter	100 Mesh
Weight with Supplied Cup ¹	692g (1.39lbs)
Weight without Cup	502g (1.1lbs)
Dimensions with Cup	340 x 170 x 42mm (13.39 x 6.69 x 1.65")
Sound Pressure Level (Average)	80 dB
Compliance	ATEX II 2G x (Directive 2014/34/EU)
Ordering Information	See page 2-39

¹ Depending on part number ordered - see packing list for details, page 2-15

Consistent quality finish guaranteed

- 1 Interchangeable stainless steel nozzles for optimum paint flow, fast and smooth application
- 2 Interchangeable colour coded aluminium aircaps available in high transfer EPA and HVLP, perfect for colour matching and finish with basecoats, clearcoats and one coat systems.
- 3 There are no metallic or plastic external parts used for air distribution, making the cleaning process easier.
- 4 High precision “soft flow” air valve allows accurate set up of air pressure without wasting paint.

NO PAINT SPRAYING IS REQUIRED

so no paint is wasted whilst setting up optimal spray pattern.

Low maintenance

- 5 Manufactured without gaskets or seals in the product area. No air diffusers, no blind chambers, no threads in contact with paint. Just metal in contact with metal. Extremely easy to clean and maintain.

- 6 Manufactured with only one single piece automatic paint packing gland minimising potential damage and breakage and much easier to remove when cleaning the gun.

Making the sprayer painter's job easier

- 7 Anodized forged aluminium body; ergonomic, light and perfectly balanced. Great robustness and high protection against corrosion.
- 8 Ergonomically designed stainless steel trigger reducing operator discomfort and fatigue.
- 9 Product regulator. Great sensitivity in adjusting the amount of material to apply.

Sagola X 4100 Aircaps, Needle & Nozzle Kits

With high **product transfer efficiency** giving better coverage saving paint and time, the **Sagola X series aircaps** offer one of the **highest performance** and **lowest air consumption** in their category.

TECHNICAL SPECIFICATION

X SERIES XT01 Conventional (CA) Aircap

Ideal for basecoats, clearcoats, primers and fillers

Needle & Nozzle	Ideal for use with:	Working Pressure Range	Air Consumption at 2bar (29psi)	Output Flow (average)	Application Distance	Fan Width (max)
1.30 (1.30mm)	Basecoats	1.8 - 2.2bar (26 - 32psi)	235lpm (8.30cfm)	171g/min (6.03oz/min)	18 - 20cm (7 - 7.9")	250mm (9.84")
1.40 (1.40mm)	Basecoats, Clearcoats, One Coat Systems	1.8 - 2.2bar (26 - 32psi)	235lpm (8.30cfm)	175g/min (6.17oz/min)	18 - 20cm (7 - 7.9")	255mm (10.04")
1.60 (1.60mm)	Fillers	1.8 - 2.2bar (26 - 32psi)	235lpm (8.30cfm)	209g/min (7.37oz/min)	18 - 20cm (7 - 7.9")	285mm (11.22")

X SERIES X96 Conventional (CA) Aircap

Ideal for basecoats, clearcoats, single stage and fillers

Needle & Nozzle	Ideal for use with:	Working Pressure Range	Air Consumption at 2bar (29psi)	Output Flow (average)	Application Distance	Fan Width (max)
1.30 (1.30mm)	Basecoats	1.8 - 2.2bar (26 - 32psi)	250lpm (8.83cfm)	177g/min (6.24oz/min)	18 - 20cm (7 - 7.9")	260mm (10.24")
1.40 (1.40mm)	Clearcoats Single Stage	1.8 - 2.2bar (26 - 32psi)	250lpm (8.83cfm)	178g/min (6.28oz/min)	18 - 20cm (7 - 7.9")	270mm (10.6")
1.60 (1.60mm)	Fillers	1.8 - 2.2bar (26 - 32psi)	250lpm (8.83cfm)	216g/min (7.62oz/min)	18 - 20cm (7 - 7.9")	310mm (12.2")
1.80 (1.80mm)	Fillers	1.8 - 2.2bar (26 - 32psi)	250lpm (8.83cfm)	293g/min (10.34oz/min)	18 - 20cm (7 - 7.9")	380mm (15.0")

The Sagola X 4100 Aircap range consists of conventional and HVLP aircaps for perfect colour matching and finish for basecoats, clearcoats and one coat systems.

X SERIES XT03 High Volume Low Pressure (HVLP) Aircap

For high volume and low pressure applications - ideal for basecoats or fillers.

Needle & Nozzle	Ideal for use with:	Working Pressure Range	Air Consumption at 2bar (29psi)	Output Flow (average)	Application Distance	Fan Width (max)
1.30 (1.30mm)	Basecoat	1.8 - 2.0bar (26.1 - 29psi)	465lpm (16.42cfm)	139g/min (4.9oz/min)	12 - 15cm (4.72 - 5.9")	240mm (9.45")
1.40 (1.40mm)	Basecoat	1.8 - 2.0bar (26.1 - 29psi)	465lpm (16.42cfm)	143g/min (5.04oz/min)	12 - 15cm (4.72 - 5.9")	245mm (9.65")
1.60 (1.60mm)	Fillers	1.8 - 2.0bar (26.1 - 29psi)	465lpm (16.42cfm)	165g/min (5.82oz/min)	12 - 15cm (4.72 - 5.9")	270mm (10.63")
1.80 (1.80mm)	Fillers	1.8 - 2.0bar (26.1 - 29psi)	465lpm (16.42cfm)	202g/min (7.13oz/min)	12 - 15cm (4.72 - 5.9")	295mm (11.61")

X SERIES 64S Conventional (CA) Aircap

For high viscosity products

Needle & Nozzle	Ideal for use with:	Working Pressure Range	Air Consumption at 2bar (29psi)	Output Flow (average)	Application Distance	Fan Width (max)
2.20 (2.20mm)	Putty Fillers	2.0 - 2.5bar (29 - 36.3psi)	305lpm (10.77cfm)	290g/min (10.23")	18 - 20cm (7 - 7.9")	280mm (11.02")

Sagola X 4100 Ordering Information

The **Sagola X 4100** is available to purchase as a complete kit with the aircap, needle and nozzle specified, supplied and fitted.

Alternatively, as the spray gun is universal and it can be used with any of the aircaps in the X 4100 range, all items can be purchased separately to meet your specific requirements.

Sagola X 4100 Kit

Each **Sagola X 4100 Spray Gun** is supplied complete with:

- ① Aircap, needle & nozzle kit (fitted)
- ② 650ml (22fl oz) Reusable Plastic Gravity Cup with product filter
- ③ Wrench for removing and fitting the nozzle and all servicing needs
- ④ Cleaning brush
- ⑤ Air valve key for changing the air valve

ACCESSORIES

Part Number	Description
PT56418020	RC1 Premium Air Flow Regulator with Analogue Pressure Gauge
PT56418084	Reusable Gravity Cup - Plastic; 650ml (22fl oz) with Product Filter
PT56418085	Reusable Gravity Cup - Plastic; 650ml (22fl oz) without Product Filter
PT56418082	Reusable Gravity Cup - Aluminium; 1 Litre (33.8fl oz) ²
PT56418017	Gravity Cup Product Filter; 650ml (22fl oz) (x10)
PT56418003	Gravity Cup Product Filter; 1 Litre (33.8fl oz) (x10)
PT55711612	Coupling for Disposable Gravity Cup - 3M PPS
PT55711627	Coupling for Disposable Gravity Cup - 3M PPS Series 2.0
PT55711616	Coupling for Disposable Gravity Cup - MIPA-CARWOX
PT55711614	Coupling for Disposable Gravity Cup - GERSON-NORTON
PT55711615	Coupling for Disposable Gravity Cup - FLEXI-CUP

For high speed application with a high quality finish the Sagola X 4100 suction spray gun offers an unbeatable finish quality.

SAGOLA X 4100

SUCTION SPRAY GUN

CA

- **3 Year warranty**
with minimal maintenance required
- **Engineering excellence**
metal on metal technology - minimal maintenance required
- **Interchangeable aircaps, needles & nozzles**
for a high quality spray, whatever the coating

COMPLIANCE:

ATEX  2 II GX
(Directive 2014/34/EU)

Key Features

The large capacity and application speed of the **Sagola X 4100** means it's ideal for spraying large areas, machinery or industrial vehicles.

Small, light and easy to use

To reduce fatigue and improve usability the size and weight of the Sagola X 4100 has been reduced and the centre of gravity altered to make it more comfortable.

Precision control

As well as the 'soft flow' air valve that provides the ultimate feeling of control on the trigger at any air inlet pressure, the product regulator allows fingertip adjustment of the amount of product you want to apply whilst the progressive fan regulator allows you to alter the pattern size to suit your needs.

Metal on metal contact

No gaskets, rubber or plastic parts in product area. Designed without air diffusers. Extremely easy to maintain and clean.

Wide range of high performance aluminium aircaps and nozzles

With a range of aircaps to fit any spraying need, the durable anodized aluminium aircaps are corrosion resistant - ideal for harsh environments.

Light weight and ergonomic, ideal for use over long periods.

Air valve "Soft Flow" provides ultimate control at the trigger.

High speed of application.

Sagola X 4100 Ordering Information

The **Sagola X 4100 Series** is available to purchase as a complete kit with the aircap, needle and nozzle specified supplied and fitted.

 X Series Conventional (CA) Aircap Ideal for basecoats, primers and fillers						
Needle & Nozzle [Aircap]	Ideal for use with:	Working Pressure Range	Air Consumption at 2bar (29psi)	Output Flow (average)	Application Distance	Fan Width (max)

Product Inlet Coupling	19mm (¾") BSP Male		
Design Pressure	8bar (116psi)		
Working Pressure	2bar (29psi)		
Packing List	Sagola Stucco Pressure Spray Gun with aircap, needle & nozzle kit (supplied fitted), Hexagonal Wrench & Cleaning Brush		

PART NUMBERS

Part Number	Description
PG20150901	Sagola Stucco Pressure Spray Gun with 2.8B Aircap & 2.80mm Stainless Steel Needle & Nozzle Kit
PG20150902	Sagola Stucco Pressure Spray Gun with 2.2B Aircap & 3.20mm Stainless Steel Needle & Nozzle Kit
PT56418417	Air Flow Regulator; ¼" M-F

ACCESSORIES & SPARES

Part Number	Description
PT56418254	Sagola Stucco: 2.8B Aircap (includes Aircap Nut)
PT56418252	Sagola Stucco: 2.2B Aircap (includes Aircap Nut)
PT56418256	Sagola Stucco: 3.2B Aircap (includes Aircap Nut)

For a complete list of spares / replacements parts - see Section 7 Spare Parts.

Ideal for use with Elcometer P30B & P60B Pressure Tank, see page 1-12

Idea for highly refined ceramic applications using abrasive products, the Sagola 4100 Xtreme Ceramic offers high speed application and unbeatable finish quality.

SAGOLA

4100 XTREME CERAMIC

PRESSURE SPRAY GUN

AS

SC

Ideal for vitreous ceramics
using abrasive products

- **Ergonomic and easy to use**
perfectly balanced for comfortable use over long periods
- **Minimal maintenance**
with no seals or plastic parts in the product area it is easy to clean and maintain
- **Corrosion resistant**
tungsten carbide needles & nozzles with anodised aluminium air caps to prevent wear from abrasive products

COMPLIANCE:

ATEX  2 II GX

(Directive 2014/34/EU)

TECHNICAL SPECIFICATION

Model	Sagola 4100 Xtreme Ceramic		
Dimensions With Cup	200 x 190 x 420 mm (7.01 x 0.75 x 6.91")	Weight	552g (xxlbs)
Air Inlet Coupling	19mm (¾") BSP Male		
Product Inlet Coupling	6.35mm (¼") BSP Male		
Design Pressure	10bar (145psi)		
Working Pressure	2 - 3bar (29 - 43.5psi)		
Materials in contact with product	Stainless Steel, POM, Teflon, Nylon & Tungsten Carbide		
Compliance	ATEX II 2G x (Directive 2014/34/EU)

The Sagola 4100 PD designed for dense products, ideal for road marking paints, primers, waterproofing, intumescent, soil stabilising coatings etc.

SAGOLA

4100 EXTREME PD

PRESSURE SPRAY GUN

AS

SC

The perfect spray gun for road decal markings.

- **Cost effective**
Affordable alternative to apply viscose materials
- **Versatile applications**
Warehouse floors road marking paints, cementitious intumescent coatings, sound deadening materials
- **Duck Bill Air Cap**
Creates sharp edges on road lines & ideal for spraying into hard to reach areas

TECHNICAL SPECIFICATION

The Sagola V4000 airspray automatic spray guns ensures a consistent high quality finish for the most demanding automated spray lines.

SAGOLA V4000

AUTOMATIC SPRAY GUN

AS

Highly durable operating piston designed and tested for demanding continuous paint lines

Robust forged anodized aluminium body, treated with an anti-corrosion coating both inside and out, for high protection against corrosion.

All the benefits of the Sagola X4100 in an automatic spray gun.

Metal to metal technology. No gaskets, O-rings or plastic parts in the fluid area.

Highly durable self-adjusting packing gland.

Product regulator. Precision adjustment with vernier set to "0".

All connections on the same side of the gun or quick change mount for easier setup of the painting line.

Quick connector air spray inlet.

Quick connector product/fluid inlet.

Anodized aluminium aircaps (corrosion free). Great resistance and durability. Suitable for aggressive environments.

High precision progressive fan regulator.

Key Features

The **Sagola V4000** is manufactured **without gaskets or seals in the product area**. **No air diffusers, blind chambers or threads** in contact with the paint/product/material. Just metal in contact with metal, making it **easy to clean and maintain**.

Manual or robotic control

For fully automated paint lines the Sagola V4000 is available with automatic fan size regulation, where an air inlet replaces the manual regulator wheel.

Quick Change - minimal downtime

Available with quick change mount, the Sagola V4000 simplifies maintenance and cleaning work, allowing you to reposition the gun in exactly the same place keeping the setup parameters.

Versatile

The extensive range of interchangeable needles, nozzles, and aircaps enables the Sagola V4000 to apply all types of paints and sprayable products - even abrasive fluids!

Metal on metal technology

The Sagola V4000 has no air diffusers, blind chambers or threads in contact with paint, and no gaskets, seals or plastic parts in the product area - just metal on metal contact making it easier to clean and maintain.

Access to complex shaped parts

Thanks to its size, the Sagola V4000 Series can be manoeuvred to access even the most complex components.

Quality built in

Manufactured in accordance with International Standards EN 1953:2013 Ap. 5.2.4

Sagola V4000 Automatic Spray Guns

Easy to change

Maximising productivity and reducing downtime, the quick change mount of the **Sagola V4000** **simplifies maintenance and cleaning work & maximises productivity**. To swap out the Sagola V4000 Automatic Spray Gun without changing any parameters simply turn the rapid connector.

Manufactured in accordance with EN 1953:2013 Ap. 5.2.4.

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

The Sagola Mini V is a small high precision automatic spray gun ideal for small components or hard to access areas on the paint line.

SAGOLA MINI V

AUTOMATIC SPRAY GUN

Stainless steel automatic paint packing gland with no gaskets - just metal on metal technology.

High precision product regulator.

AS

Stainless steel needle and nozzle.

Fan regulator allows us to adjust the size of the fan.

Fan control regulator allows perfect distribution of the spray pattern independently of the viscosity of the product.

- **Compact size**

Ideal for small complex parts or restricted access, the Sagola Mini V fits in the smallest of spaces

- **Reliable**

featuring metal on metal technology the Sagola Mini V has few maintenance parts to prevent downtime

- **Precision regulation**

paint flow, fan and pattern shape, 50mm (2") fan size up to 348mm (13.7")

The **Sagola Mini V** is manufactured **without gaskets or seals in the product area**. **No air diffusers, blind chambers or threads** in contact with the paint/product/material. Just metal in contact with metal, making it **easy to clean and maintain**.

Versatile

The extensive range of interchangeable needles, nozzles, and aircaps enables the Sagola Mini V to apply all types of solvent or water-based products,.

Metal on metal technology

Incredibly reliable, the Sagola Mini V has no air diffusers, blind chambers or threads in contact with paint, and no gaskets, seals or plastic parts in the product area - just metal on metal contact, making it easier to clean and maintain.

Access to complex shaped parts

Thanks to its size, the Sagola Mini V can be manoeuvred to access even the most complex components.

TECHNICAL SPECIFICATION			
Dimensions		116 x 48 x 58mm (4.5 x 1.8 x 2.3")	Weight 216g (7.6oz)
Operation inlet connection		4mm (0.157")	
Air inlet connection		8mm (0.314")	
Product inlet connection		Tube Ø6xØ4 mm	
Maximum air pressure		5bar (72.5psi)	
Recommended maximum air pressure		2 - 3bar (29 - 43.5psi)	
Average sound pressure level		84db (EPA) 85db (HVLP)	
Materials in contact with the product		Stainless steel, anodized aluminum, graphite teflon, nylon, nickel-plated brass	
Compliance		ATEX II 2G T4 x (Directive 2014/34/EU)	
Recommended application distance	Mini EPA	18 - 20cm (7.0 - 7.8")	
	Mini HVLP	12 - 15cm (4.7 - 5.9")	
	Mini Conventional	18 - 20cm (7.0 - 7.8")	
Packing List		Sagola Mini V Automatic Spray Gun complete with Sagola Mini V Aircap, Stainless Steel Needle & Nozzle Kit, Cleaning Brush & Wrench	

Sagola Mini V Aircaps, Needle & Nozzles

High production automatic air assisted airless spray gun designed to reduce mist and improve work conditions on production lines.

SAGOLA V7 MIX

AIR ASSISTED AIRLESS
AUTOMATIC SPRAY GUN

AA

Reduces mist and improves work conditions.

- **High open and close rates**
Tungsten carbide product closure mechanism, ideal for use with robots and specialist machinery
- **High efficiency with low product consumption**
ensures minimal mist, lowering pollution, reducing product costs
- **High pressure and application speed**
ideal for lacquers, clearcoats, UV paints, etc.

The Sagola V2 PD is designed for dense products, ideal for marking paints, primers, waterproofing, intumescent, soil protection etc.

SAGOLA

V2 PD

AUTOMATIC SPRAY GUN

AS

SC

Ideal for production lines
applying dense gypsum based
materials

- **6mm internal mixing nozzle**
fast and accurate application with over 80% material transfer
- **High viscosity products**
designed for marking paints, primers, waterproofing, intumescent or soil protection
- **Minimal maintenance**
with no seals or plastic parts in the product area it is easy to clean and maintain

TECHNICAL SPECIFICATION

Model	Sagola V2 PD		
Dimensions	172 x 53 x 72mm (6.8 x 2.1 x 2.8")	Weight	552g (1.22lbs)
Air Inlet Coupling	19mm (¾") BSP Male		
Product Inlet Coupling	6.35mm (¼") BSP Male		
Maximum Air Pressure	8bar (116psi)		
Working Pressure	2 - 3bar (29 - 43.5psi)		
Air Consumption (2bar inlet)	147 lpm		
Average Sound Pressure Level	80dB		
Materials in contact with product	Stainless steel, nickel-plated brass, tressylene, carbonitride steel.		
Compliance	ATEX II 2G x (Directive 2014/34/EU)		
Recommended Application Distance	18 - 20cm (7 - 7.8")

AIR FILTRATION

3.1 AIR
FILTRATION

3.2 AIR
TREATMENT

Sagola air filtration systems remove oil, moisture, particulates and organic fumes to ensure **maximum air filtration** for a flawless paint finish.

Easy **to set up** and **to maintain**, **better to spray** with for **consistent, high quality** results - there are different stages of filtration:

1

Stage 1 - Centrifugal force for large particulates, water & oil

- The friction of the compressed air against the walls of the unit produces a decanting of solid and liquid particles which fall to the bottom of the unit's vessel.
- The compressed air is forced through the porous brass filter, in a downward flow, generating an increase in speed which then sharply changes to an upward direction which produces a further decanting of the liquid particles that were in condensation.

2

Stage 2 - Coalescent filtration down to 0.01 micron

- When the compressed air goes through the coalescent filter it groups the liquid particles (water, oil, etc...) turning them into larger particles which accumulate at the bottom of the vessel.
- The coalescent filter elements remove particles down to 0.01 microns (including aerosols with a droplet size greater than 0.01 microns).

3

Stage 3 - Activated carbon filter for oil vapours, smells & hydrocarbons

- When the compressed air goes through the activated carbon filter it eliminates the oil vapours, smells and other hydrocarbons in the air and compressed gas which gather at the bottom of the vessel.
- Ideal for breathe air, waterborne or HS paints for the ultimate finish.

Air Filtration Systems Explained

The air from a compressor, which is circulating throughout the line, can contain particles, solid impurities, water from the relative humidity of the compressed air and burnt oil from the compressor.

Sagola air filtration systems help to ensure a flawless finish by eliminating these impurities whilst minimising pressure loss and maximising performance.

The removal of all impurities helps to prevent oxidation and premature tool wear

Best in class air filtration for the most demanding industrial spray booths.

SAGOLA 5000X

AIR FILTRATION SYSTEM

- **High performance filtration**
for maximum air quality with minimum pressure loss
- **3 Year warranty & minimal maintenance**
simple filter replacement
- **Engineering excellence**
tough heavy duty construction for long service life

Key Features

The **Sagola 5000 Series** air filtration system removes oil, moisture, particulates and organic fumes, ensuring **maximum air filtration** with **minimum pressure loss** throughout the system, ideal for waterborne or high solid based paints.

Maximum air quality

The Sagola 5300X and 5300X+ air filtration systems offer the maximum filtration level in spray booths and spraying lines with high quality air demand. Ideal for waterborne paint and where organic fumes in the network are a problem.

High flow with minimum pressure loss

With a flow rate greater than 3000l/min (106cfm)*, the Sagola 5000X Series has been specially designed to minimise pressure loss, allowing it to support two air guns at once.

Versatile modular system

If you need to upgrade your system from a standard filter to a coalescent system or upgrade to activated carbon, with the Sagola 5000X modular system you can easily do this with a conversion kit.

Built to last with minimal maintenance

Manufactured out of machined aluminium with either stainless steel or aluminium* couplings the Sagola 5000X Series is incredibly durable.

Range of options

From pre-filters for moisture separation to coalescent filters to remove particulates down to 0.01 micron or activated carbon for breathe air, the Sagola 5000X Series is available in a range of options to meet the demands of any bodyshop.

Modular system allows you to adapt your filtration to your changing needs.

When you start using the filter press the "ON" button to monitor the life of your filter unit.

* Dependent on model

SAGOLA 5000X

Air Regulator Filter - Stage 1

Air filter with 2 outlets, pressure regulator & pressure gauge

- Ideal for booths working with solvent-based paints and preparation areas.
- Semi-automatic draining system.
- It has 2 outlets allowing you to use two tools at once.
- Tough machined aluminium casing.
- Membrane mechanical regulator.
- Friction and centrifugal filtration with 40 micron porous brass filter to retain water, oil and other impurities.

1

Sagola 5000X

Sagola 5050X

Sagola 5050X

Air Pre-Filter - Stage 1

Air pre-filter with single outlet

- The Sagola 5050X is an air regulator filter, ideal for the pre-filtration in industrial air lines.
- Designed for the outlet of medium compressors (inlet 1/2") and ideal for changes in height levels in the line network, booths inlets, etc.
- Semi-automatic draining system.
- Tough machined aluminium casing.
- Friction and centrifugal filtration with 8 micron porous brass filter to retain water, oil and other impurities.

TECHNICAL SPECIFICATION

Air Flow (at 7bar)	>3000l/min (106cfm)
Air Inlet	12.7mm (1/2") BSP
Air Outlet	6.35mm (1/4") BSP
Maximum Working Pressure	12bar (174 psi)
Maximum Operating Temperature	90°C (194°F)
Drain System	Semi-automatic
Dimensions	Sagola 5000X: 148 x 119 x 384mm (5.93 x 4.69 x 15.12") Sagola 5050X: 114 x 119 x 339mm (4.49 x 4.69 x 13.35")
Weight	Sagola 5000X: 2.3kg (5.07lbs) Sagola 5050X: 1.95kg (4.30lbs)
Packing List	Sagola 5000X: Sagola 5000X Air Regulator Filter - Single Stage containing Brass Filter (40µm) with Integrated "Life" Timer, Male BSPT 6.35mm (1/4") Coupling (x2)*, Analogue Pressure Gauge (x1) & Support Bracket Sagola 5050X: Sagola 5050X Air Pre-Filter - Single Stage containing Brass Filter (8µm) with Integrated "Life" Timer, Male BSPT 6.35mm (1/4") Coupling (x1)* & Support Bracket

SAGOLA 5100X

1

Air Regulator Filter - Stage 1

with pressure regulator and pressure gauge

- Friction and centrifugal filtering.
- Incorporates an 8 micron sintered brass filter.
- Triple filtration system retains water and impurities.
- 2 outlets allowing you to use two tools at once.
- Tough machined aluminium casing is tougher and more protective.
- Comes with a new automatic draining system which reduces maintenance costs due to its greater durability.
- Valid for HS paints and the highest quality finishes.
- Self-draining system and air assisted regulator wheel.

TECHNICAL SPECIFICATION

Air Flow (at 7bar)	>3000l/min (106cfm)
Air Inlet	12.7mm (½") BSP
Air Outlet	6.35mm (¼") BSP
Maximum Working Pressure	12bar (174psi)
Maximum Operating Temperature	90°C (194°F)
Drain System	Automatic
Dimensions	159 x 123 x 373mm (6.26 x 4.84 x 14.65")
Weight	2.64kg (5.82lbs)
Packing List	Sagola 5100X Air Regulator Filter - Single Stage containing Brass Filter (8µm) with Integrated "Life" Timer, Male BSPT 6.35mm (1/4") Coupling (x2)*, Analogue Pressure Gauge (x1) and Support Bracket

Part Numbers	Euro-profile	US-MIL	NITTO
Sagola 5100X Air Regulator Filter - 1 Stage Filter	PT10730206	PT10730202	PT10730208

* US-MIL, Euro-profilee or NITTO version depending on part number ordered.

SAGOLA 5200X

2 Stage Air Regulator Filter

With 2 air purifying stages, mechanical brass and coalescent filter, a pressure regulator and two line pressure gauges.

- Self-draining system and assisted regulator wheel.
- Incorporates an 8 micron sintered brass filter, followed by a final 0.01 micron coalescent filter.
- 2 outlets allowing you to use two tools at once.
- New vessels are tougher and more protective.
- New draining system reduces maintenance costs due to its greater durability.
- Double filtration with optimum flow and pressure regulation, retention of water and impurities attaining an air purity of 99%.

SAGOLA 5300X

3 Stage Regulator Filter

With a mechanical brass filter, coalescent filter and a wide surface activated carbon filter

- Offers the maximum filtration level in spray booths and spraying lines where finishing is highly demanding.
- Sintered brass 8 micron pre filtration is incorporated, followed by a 0.01 micron coalescent filter and final filtration by a wide surface active carbon filter.
- This process eliminates, in addition to water and impurities, organic fumes and foul air. Ideal for waterborne paint lines and where organic fumes in the network are a problem.

SAGOLA 5300X Plus

3 Stage Plus Regulator Filter

Double outlet after the coalescent filter & final single outlet

- Similar technical and mechanical characteristics to the 5300X.
- The Sagola 5300X Plus offers the maximum filtration level in spray booths and spraying lines with high quality air demand. Ideal for waterborne paint and where organic fumes in the network are a problem.
- Sintered brass 8 micron pre-filtration is incorporated, followed by a 0.01 micron coalescent filter and final filtration by a wide surface active carbon filter. In addition to water and impurities, this process eliminates organic fumes and foul air.

Sagola 5100X to 5200X Unit Conversion Kit

Quick Couplings

Manufactured in aluminium or hardened steel with gasket in nitrile butadiene, safe and hermetic locking system.

Available in Euro-profile, US-Mil, Multi-profile and Nitto system. Silicone-free joints. See section 5.

Anti Static Air Hoses

Antistatic and anti-adherent hose. Great flexibility and lightness. Clamping fittings for maximum safety. Inner diameter of 8mm, enough for any model of spray gun. See section 5.

Automatic drain

For Sagola Air Heaters see page 3-24

Modular air filtration systems for the most demanding industrial spray booths.

SAGOLA 4000X

AIR FILTRATION SYSTEM

- **Economic 2 stage modular air filtration**
delivering high quality filtration
- **Engineering excellence**
tough heavy duty construction for long service life
- **Ideal for waterborne or high solid based paints**
for high quality spray, whatever the coating

Key Features

The **Sagola 4000X Series** modular air filtration system is the effective solution for compressed air filtration in professional paint booths.

Maximum air quality

Professional line of air filters and regulators offer maximum filtering, smooth functioning and strength, at the best price/quality ratio. The Sagola 4000X series removes moisture, oil down to 0.01 microns, and ensures a minimum air pressure drop - maximum air flow 2940l/min (103cfm)*.

Precision control

With an easy to read analogue pressure gauge displaying bar and psi and a highly accurate regulation system with oversized regulating wheel makes it easy to control - even with gloved hands.

Reliable and easy to maintain

Manufactured out of machined aluminium with an anticorrosion treatment on all surfaces, the reliable Sagola 4000X series is highly durable and requires minimal maintenance.

Automatic draining system

The combination of automatic drain in the first stage and semi-automatic in the second means that the level of condensate inside the filter is kept very low.

Modular system allows you to adapt your system to your changing needs..

Easy to maintain with fast filter replacement.

* Dependent on Model.

SAGOLA 4120 Plus

Air Regulator Filter - Stage 1

Air filter and moisture separator with pressure regulator

- Highly reliable air regulation system that eliminates air, oil and particles down to 24 microns.
- Manufactured from a solid aluminium block.
- Friction and centrifugal filtration.
- Automatic drain of condensed liquids.
- High air flow.
- High quality analogue pressure gauge.
- Easy wall mounting.

Sagola 4120 Plus cross-section

TECHNICAL SPECIFICATION

Air Flow (at 7bar air inlet pressure)	2910l/min (103cfm)
Air Inlet	12.7mm (½") BSP
Air Outlet	6.35mm (¼") BSP
Maximum Working Pressure	12bar (174psi)
Maximum Operating Temperature	90°C (194°F)
Drain System	Automatic
Dimensions (without coupling)	97 x 117 x 279mm (3.82 x 4.61 x 10.98")
Weight	1.22kg (2.69lbs)
Packing List	Sagola 4120 Plus Air Regulator Filter - Single Stage containing Brass Filter (24µm), Male BSPT 6.35mm (¼") Coupling (x1)*, Analogue Pressure Gauge (x1) and Support Bracket

Part Numbers	Euro-profile	US-MIL	NITTO
Sagola 4120 Plus Air Regulator Filter - 1 Stage Filter	PT10730504	PT10730502	PT10730503

SAGOLA 4220 Plus

1**2**

Air Purifying Filter - 2 Stage

With 2 air purifying stages, mechanical and coalescent, a pressure regulator and a line pressure gauge.

- Effective solution for compressed air filtration in professional paint booths.
- Highly reliable air regulation system.
- Manufactured from a solid aluminium block.
- Eliminates air, oil and particles down to 0.01 micron.
- Friction and centrifugal filtration.
- Automatic drain of condensed liquids.
- High air flow.
- High quality analogue pressure gauge.

Sagola 4220 Plus

SAGOLA 430 Plus

Mini Air Regulator

Air pressure regulator

- Highly reliable air regulation system.
- Manufactured from a solid aluminium block.
- Diaphragm regulator from 0 to 10bar (145psi).
- Quick release and short shift wheel.
- High quality analogue pressure gauge.
- Easy wall mounting.

Sagola 430 Plus

TECHNICAL SPECIFICATION

Air Flow (at 7bar air inlet pressure)	1200 - 1700 l/min (60cfm)
Maximum Working Pressure	10bar (145psi)
Maximum Operating Temperature	90°C (194°F)
Dimensions (without coupling)	107 x 65 x 115 mm (4.21 x 2.56 x 4.53")
Weight	544g (19.19lbs)
Packing List	Sagola 430 Plus Mini Air Regulator

Part Numbers	½" Inlet	¾" Inlet	1" Inlet
Sagola 430 Plus Mini Air Regulator	PT10740501	PT10740502	PT10740503

SAGOLA 439 Plus

Air Filter

High flow filter for insertion in air lines

- Semi-automatic draining system.
- Minimum pressure loss.
- Suitable for all type of installations, accessories included.
- Made in aluminium, high-durability.
- Liquid residue check window.
- Minimum maintenance.

Sagola 439 Plus

TECHNICAL SPECIFICATION

Air Flow (at 7bar air inlet pressure)	1700l/min (60cfm)
Maximum Working Pressure	10bar (145psi)
Maximum Operating Temperature	90°C (194°F)
Drain System	Semi-automatic
Dimensions (without coupling)	158 x 73 x 73 mm (6.22 x 2.87 x 2.87")
Weight	553g (19.51lbs)
Packing List	Sagola 439 Plus Air Purifier

Part Numbers	½" Inlet	¾" Inlet	1¼" Inlet
Sagola 439 Plus Air Purifier	PT10720401	PT10720402	PT10720403

ACCESSORIES

Part Number	Description
PT53610204	40µm Porous Bronze Filter

SAGOLA 437 Plus

Air Lubricator

Ideal for the proper lubrication of pneumatic tools.

- Safe operation from 3l/min.
- Minimum flow restrictions.
- Multiple inlet and outlet dimensions ($\frac{1}{2}$ ", $\frac{3}{8}$ " and $\frac{1}{4}$ ". ft
- Oil level check window.
- Manual oil regulator by level check window, drop by drop system.
- CNC machined in solid aluminium.
- Made in aluminium.
- Minimum maintenance.

Sagola 437 Plus

TECHNICAL SPECIFICATION

Air Flow (at 7bar air inlet pressure)	1920l/min (67.8cfm)
Maximum Working Pressure	10bar (145psi)
Maximum Operating Temperature	90°C (194°F)
Dimensions (without coupling)	165 x 73 x 73 mm (6.49 x 2.87 x 2.87")
Weight	446g (15.73lbs)
Packing List	Sagola 437 Plus Air Lubricator

Part Numbers	$\frac{1}{2}$ " Inlet	$\frac{3}{8}$ " Inlet	$\frac{1}{4}$ " Inlet
Sagola 437 Plus Air Lubricator	PT10710301	PT10710302	PT10710303

SAGOLA 479 Plus

Purifier Regulator

The most compact design for the small workshops, industry or air supplies to pneumatic tools.

- Made in solid aluminium.
- High air flow.
- Quality pressure gauge.
- Highly reliable regulation system.
- Suitable for multiple hose sizes, couplings included.
- High filtering capacity with impurities check windows.
- Semi-automatic draining system.

Sagola 479 Plus

TECHNICAL SPECIFICATION

Air Flow (at 7bar air inlet pressure)	1700l/min (60cfm)
Maximum Working Pressure	10bar (145psi)
Maximum Operating Temperature	90°C (194°F)
Drain System	Semi-automatic
Dimensions (without coupling)	229 x 79 x 115mm (9.01 x 3.11 x 4.53")
Weight	886g (31.25lbs)
Packing List	Sagola 479 Plus Purifier Lubricator

Part Numbers	½" Inlet	¾" Inlet	1" Inlet
Sagola 479 Plus Purifier Regulator	PT10730401	PT10730402	PT10730403

ACCESSORIES

Part Number	Description
PT53610204	40µm Porous Bronze Filter

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

From combined product and air hose to quick couplings or connectors, we offer a comprehensive quality range to meet all your requirements.

For the full range of Hoses and Couplings,
see page 4-2

Consistent air quality
all year round
ensures professional
quality spray.

SAGOLA PACK 6000X AIR HEATER

- Ensures a constant temperature regardless of environmental conditions for consistent quality finish
- Engineering excellence compact robust design with a 3 year warranty and minimal maintenance required
- Ideal for industrial applications for high quality spray, whatever the coating

Key Features

The **Sagola Pack 6000X** air heater system heats compressed air to a constant working temperature together with a reduction of the dew point temperature ensures a stable spraying process for consistent quality spray.

Avoid condensation problems

Heating the compressed air reduces its relative humidity avoiding condensation problems in cold and wet environments.

Maximum Air Quality All Year Round

Regardless of the environmental conditions, the Sagola 6000X supplies compressed air used in spraying processes at a constant temperature, even when there are large temperature differences between day and night, winter and summer.

Optimal Surface Quality Finish

The use of this equipment provides an optimal surface quality finish, whilst maintaining a constant temperature in the compressed air, as required for the application of certain types of products.

Easy to Use

Lightweight, small and easy to install, the Sagola 6000X is fitted with a PID digital temperature controller and push button LED display with red and green indicators to identify when up to the temperature selected.

Cool Touch Case

The cold air enters the pressurised chamber cooling the outer shell of the equipment, keeping it isolated from the hot chamber inside ensuring the Sagola 6000X is safe to touch.

Minimal Heat Loss

The Sagola 6000X is supplied with an anti-static hose specially designed to prevent air heat loss before it reaches the nozzle.

Heated hose system. Independent to the room temperature.

Digital temperature display.

Sagola Pack 6000X Air Heater

- PID Digital temperature controller
- Thermocouple temperature sensor
- Self-learning function
- Overheating protection
- Automatic activation by flow switch

- 1 Controls
- 2 Mains switch
- 3 a) Red LED (Heating)
- 3 b) Green LED (Ready)
- 4 Temperature sensor
- 5 Flow meter
- 6 Cold air chamber (depressurised)
- 7 Hot air chamber (pressurised)
- 8 Air inlet (from air filter)
- 9 Air outlet (hose)
- 10 Electrical connection
- 11 Wall mounting bracket

Sagola Pack 6000X Air Heater

Air heating system to ensure temperature stability of compressed air at the spray gun.

- Temperature stability both in the compressed air and the final spraying elements such as hose and spray gun.
- Stable spraying process in areas with large temperature changes between day and night, winter and summer.
- Constant working temperature.
- Compact and robust.
- Digital temperature display.
- Cold touch, thermal insulation.
- Easy to use; power button and temperature controller.
- Out of the box installation.
- Lightweight and small; easy to locate.
- Correct temperature in the spray gun almost immediately.
- Supplied with an insulated hose to get the maximum energy-performance.
- Designed to be fitted after air filtration systems and before the spray gun.

Sagola 6000X
Air Heater

TECHNICAL SPECIFICATION

Power	110-240V (50-60Hz)	Maximum Consumption	800 watt
Maximum Working Pressure	7bar (101psi)	Maximum Flow at 7bar (101psi)	750l/min (26.48cfm)
Recommended Temperatures	Clearcoat: 40 - 60°C (104 - 140°F)

PT52350095	Intensity Spike Fuse; US: 110 - 130V, 60Hz

Air Filtration & Heating - What Goes Where?

The type and condition of the installed compressor and the quality of the air it is supplying must be taken into account when selecting the air filtration system.

The main line must have a 1cm/m gradient in the direction of the air flow.

Main air line
Pipe min. 1"

If an air compressor is used it must be located away from the work area, in a dry and well-ventilated area that ensures that the air sucked in is as free from impurities as possible.

The distance between the air compressor and the filtering unit must be great enough for the water and oil vapour to reach the filtering unit cold and condensed.

(A) Drain Valve
(B) Shut Off Valve
(C) Connector

When setting up the general installation, T-connections must be provided for successive network expansions.

For greater air purity the Sagola 5200X Coalescent Purifier Regulator should be installed to eliminate water and solid particles larger than 0.01 microns, water aerosols ($C > 0.01 \text{ mg/m}^3$) and oil aerosols ($C > 0.01 \text{ mg/m}^3$).

The lower parts of the installation must be equipped with automatic drains.

Alternatively the Sagola 5300X Purifier Regulator with Coalescent Filter plus Activated Carbon Filter can be used when it is necessary to eliminate oil, hydrocarbons or water in vapour form, organic fumes are present, foul air, solid particles larger than 0.01 micron and residual oil: maximum 0.003ppm.

HOSES & COUPLINGS

4.1 HOSES

4.2 QUICK COUPLINGS & CONNECTORS

Sagola Combined Air & Product Hose

AS

Combined air & product hose + cover hose for low pressure systems.

- Nylon product hose 6 x 8mm (0.24 x 0.31") with quick connect terminals.
- Adaptor 3/8" female for pressure spray guns.
- Ideal for low pressure equipments.
- Eethylene propylene diene monomer rubber (EPDM) rubber anti-static air hose 8 x 15mm (0.31 x 0.59") with high security crimped ends 1/4" F.
- Polyester protective cover of high resistance to friction and abrasion.

TECHNICAL SPECIFICATION

	Product Hose	Air Hose	Protective Cover

Sagola Anti-Static Air Hose

AS

Light, flexible and manageable anti-static air hose for air filtration systems.

- Anti-static ethylene propylene diene monomer rubber (EPDM) rubber hose.
- Exterior textile reinforcement.
- Ideal for air filtration systems.
- Light, flexible, manageable and twist free.
- High security crimped ends able to bear the high temperatures of the booth.
- No flanged joints; reducing the risk of leaks due to expansion.

TECHNICAL SPECIFICATION

Working Pressure	20bar (290psi)
Breakage Pressure	60bar (870psi)
Temperature Range	-40°C to 120°C (-40°F to 248°F)
Dimensions (I/D x O/D)	8 / 15mm (0.31 / 0.59")
Material (inside)	EPDM Rubber
Material (outside)	Textile Reinforcement
Colour	Blue
Connections	6.35mm (¼") female couplings with conical closure and flare fitting for easy assembly of the push connector
Conducting Pipe	< 1 M Ω
Compliance	97/23/CE, UNE - EN 559

Sagola Airless Product Hose

AL

Airless Product Hose compatible for use with the Elcometer Typhoon Airless Pump.

- Product hose for Airless system painting equipment.
- Product hose with metal reinforcement and maximum working pressure of 325 bar with 1/4" swivel couplings.
- Polyurethane hose (inside) and outside polyamide 6 x 11.7 mm.

TECHNICAL SPECIFICATION

Standard Product Hose	
Temperature Range	-40°C to 98°C (-40°F to 208°F)
Max Working Pressure	325bar (4713psi)
Breakage Pressure	1300bar (18854psi)
Dimensions (I/D x O/D)	6 / 11.7mm (0.24 / 0.46")
Material (inside)	Polyamide & Metal Reinforcement
Material (outside)	Polyurethane
Colour	Black
Connections	1/4" Swivel Couplings
Compliance	ATEX 2014/34/EU II 2G cT5, DIN EN 11 27-2, DIN 8028 - 6.3, BGR 132 - 3.3.5

Standard, lightweight
and safety quick
couplings to suit your
requirements

SAGOLA PLUGS & CONNECTORS

- **Wide range to suit your needs**
Available in US-Mil, Euro-Profile,
Multi-Profile and Nitto systems.
- **Ideal for pneumatic spray guns**
and any pneumatic tool from the
workshop.

SAGOLA offers a wide range of quality and robust connectors to meet your requirements.

Security versions

- Two movements to disconnect: Push - Pull.
- Anti-whiplash safety plug in accordance with ISO 4414.

Composite material

- The new range of SAGOLA plugs incorporates a handle made of composite, which gives a high resistance to both attrition and drag.
- The plug body is made of treated steel and the valve is made of brass, offering a life cycle of more than 1,500,000 uses.
- Wear resistance tested to more than 48,000 impacts and the equivalent to a 12km crawl.

Push-Pull system. Safety plug version. Easy to connect.

Lightweight

- Sagola offers the ultra-light version weighing only 45 grams (1.6oz). The body and quick release collar are made of high strength aluminum with a brass valve body.

Standard, lightweight and safety versions available for quick couplings.

Compatibility

- All steel and aluminum plugs are BSP. Males (BSPT) and females (BSPP). US-Mil, Euro-Profile, Multi-Profile and Nitto range.

Sagola Quick Couplings

Standard, Safety and Lightweight version

- Includes aluminum and safety versions.
- Long life and high attrition resistance plugs.
- Body and quick release collar made of high strength aluminum. Valve made of brass. Pins made of high strength steel.

Standard version

Safety version

VIRTUAL REALITY TRAINING

5.1 Sagola**SPRAY**™ by elcometer®

Speed up and enhance your spray gun training skills virtually, either in the classroom, at work or at home, using Sagola**SPRAY**™. Elcometer's VR technology is designed to teach and practice the four key aspects of spray gun control - distance, angle, uniformity of speed and spray overlapping, without using valuable spray booth time and with minimal hardware - just a Meta Quest™ headset.

LEARN

Sagola**SPRAY**™ teaches spray techniques that can be practiced again and again.

SAVE

Learning in a VR environment is environmentally friendly, saving paint, materials & time.

IMPROVE

Get instant feedback and learn from your mistakes, just complete & repeat!

STUDENTS & BEGINNERS

- ✓ Learn new painting techniques and get instant feedback.
- ✓ Ask questions easily without removing breathing apparatus.
- ✓ See how your skills compare to your classmates.

TEACHERS, COLLEGES & TRAINING CENTRES

- ✓ Reduce real spray time learning, product and preparation resources.
- ✓ Customisable training to hone students skills on a variety of items.
- ✓ Teach the whole class at once with a hands on experience.

INDUSTRY & PROFESSIONALS

- ✓ Improve employees speed, precision and paint consumption.
- ✓ Train employees on new products before entering the real world.
- ✓ 'Try before you hire' - test future employees before employment.

DISTANCE

Learn how to hold the gun at the perfect distance to ensure a perfect finish.

FAN PATTERN

Learn how to adjust your hand positioning to achieve the correct angle for spraying.

SPEED

Get to know the speed of the spray gun and learn how you need to move with it.

Easy to Set Up...

- 1 PURCHASE Sagola**SPRAY**™ Oculus Quest Kit Or 2 DOWNLOAD Sagola**SPRAY**™

The Sagola**SPRAY**™ Oculus Quest Kit is setup with the app and ready to use.

If you already have a headset, download Sagola**SPRAY**™ and purchase the features you require.

- 5 SELECT YOUR COLOUR

Learn how to paint with different colours to achieve an even finish.

- 6 SELECT YOUR TRAINING OBJECTIVE

Choose an objective from distance, angle, speed or alternatively select all.

Sagola**SPRAY**TM by elcometer[®]

3 SELECT YOUR INDUSTRY

Select your industry and select an item to paint, from fenders to i-beams.

4 CUSTOMISE YOUR LESSON

Make your lesson work for you by customising the lesson.

7 START SPRAYING!

Sagola**SPRAY**TM was created by real spray technicians to deliver a realistic spray experience.

8 REVIEW YOUR PERFORMANCE

Get instant feedback and learn from your mistakes, just complete & repeat!

ANCILLARY EQUIPMENT

6.1 INSPECTION EQUIPMENT

6.2 ANCILLARY EQUIPMENT

Elcometer Digital Inspection Equipment

These digital inspection kits have been specifically designed to undertake the three principal inspection requirements in the Protective and Industrial Coatings Industry – climate, surface profile and dry film thickness. The Kit consists of:

- Elcometer 224 Surface Profile Gauge(Model B) with Separate Probe
- Elcometer 319 Dewpoint Meter Model S
- Elcometer 456 Coating Thickness Gauge (Model B) with Separate Scale 1 Probe

STANDARDS:

Elcometer 138 Bresle Salt Kit

If the coating is applied to a contaminated surface, which is not properly prepared, it could fail prematurely resulting in costly re-coating and high maintenance costs.

The Elcometer 138 Bresle Kits include the Elcometer 138 Bresle Salt Meter. This lightweight portable meter measures the conductivity of the test sample using a single drop, then automatically converts this to show the density of salts, negating the need for the user to do a manual calculation when working in accordance with ISO 8502-6 or ISO 8502-9.

STANDARDS:

AS 3894.6-A, IMO MSC.215 (82), IMO MSC.244 (83), ISO 8502-6, ISO 8502-9, SSPC Guide 15, US Navy NSI 009-32, US Navy PPI 63101-000

Elcometer Cross Hatch Adhesion Tester Kit

The Elcometer 1542 is ideal for measuring the cross hatch adhesion of coatings up to 250µm (9.8mils) on flat surfaces and test panels.

Measure on large or small panels by quickly changing the position of the guide wheel using the hexagonal wrench provided.

Each cutter wheel consists of 8 cutting faces. When one face becomes worn, rotate the cutting wheel to the next face.

The Elcometer 1542 is supplied with three different cutter spacings 1, 2 & 3mm for a range of coating thickness, a brush, magnifier & ISO or ASTM adhesive tape.

STANDARDS:

AS 3894.9, AS 1580.408.4,

SAGOLA DPC™ Disposable Cup System

The Sagola DPC™ Disposable Paint Cup System by Elcometer offers a **cost effective, time saving, quick colour change** solution for today's busy spray shop professionals.

1

Tough Plastic ABS Cup

with integrated measuring guides. Available in a range of volumes from 100ml - 800ml (3.38 - 27 fl oz).

2

Disposable Liner

recyclable and designed to collapse evenly.

3

Screw Collar

with integrated cup seal.

4

Domed Lid & Filter

integrated, full diameter filter for consistent paint flow.

5

Adaptor

with enhanced twist lock connector. Compatible with all Sagola spray guns.

6

Cup Seal Plug

for storing paint whilst not in use.

Easy to Clean

Compared to traditional gravity cups the Sagola DPC™ System significantly reduces cleaning time and solvent use.

Easy to Use

On cup ratios and fill markings reduce the reliance on traditional mixing cups, just fill, mix and spray!

Easy to Store

To store unused paint between coats simply fit the Cup Seal Plug and store upside down to keep the filter wet.

Easy to Change

With a range of adaptors to fit Sagola Gravity Spray Guns as well as other manufacturers' guns, starting to use Sagola DPC™ System couldn't be easier.

A GUIDE TO environmentally safe disposal

Empty your Sagola DPC liners of material using all appropriate environmental and hazard waste protocols or leave to dry before disposing in an approved hazard waste container.

Please ensure that you dispose of all your Sagola DPC liners responsibly & ensure that all chemicals are clearly labelled and disposed of in a safe & environmentally sound manner.

Always refer to the paint manufacturer's material safety data sheet for full handling & disposal instructions.

SAGOLA DPC™ Disposable Cup System

PART NUMBERS

ADAPTER RANGE

* HOW TO ORDER

Add "-1" to the end of part number for a single adapter
 Add "-3" to the end of part number for a pack of 3
 Add "-10" to the end of part number for a pack of 10

Check with the gun manufacturer for the thread type for different models
 Adaptors for other gun manufacturers are also available, contact Elcometer for details.

Sagola Paper Paint Strainers

Sagola paint strainers are a fundamental part of the quality of paint jobs. Use the Sagola strainers for quick and perfect paint filtering for a spot-free surface.

Sagola strainers are made of paper with a 125µm (4.9mils) or a 190µm (7.5mils) mesh. The 125µm strainer is special for water-based two-layer bases and the 190µm strainer is special for varnishes and monolayers.

PART NUMBERS

Part Number	Description	Mesh	Quantity
PT40000254	Sagola Paper Paint Strainers	125µm (4.9mils)	1,000
PT40000253	Sagola Paper Paint Strainers	190µm (7.5mils)	1,000

Sagola Product Mixers

Sagola product mixers are designed to provide the perfect homogenization of the paint. Mixers made of PVC, with sufficient hardness and elasticity to prevent breakage.

Available in two lengths; 20 and 30cm by 2cm wide.

PART NUMBERS

Part Number	Description	Width	Length	Quantity
PT40000499	Sagola Product Mixer 20	2cm (0.78")	20cm (7.87")	500
PT40000320	Sagola Product Mixer 30	2cm (0.78")	30cm (11.81")	200

Sagola Mixing Cups

Four sizes available to suit every need. All of them are fitted with feet which stick to the table preventing spills. Reinforced upper border for safe handling once filled, even in the largest size. High quality silkscreened and solvent resistant.

Made of polypropylene (PP5), high thermal and chemical strength. Suitable for all paints.

Mixtures and dilutions of all types of varnishes and single stage paints 2K, HS, MS, polyurethanes, pigmented lacquers, waterborne basecoats.

PART NUMBERS

Part Number	Description	Capacity	Quantity
PT40000508	Sagola Mixing Cup 400	400ml (14.08fl oz)	200
PT40000509	Sagola Mixing Cup 650	650ml (22.9fl oz)	200
PT40000510	Sagola Mixing Cup 1300	1.3 litres (45.8fl oz)	200
PT40000511	Sagola Mixing Cup 2300	2.3 litres (80.9fl oz)	175

Sagola Cup Lids

Lids for mixing cups. Made of polypropylene (PP5), high breaking thermal and chemical strength. Suitable for all paints.

Highly reliable seal.

PART NUMBERS

Part Number	Description	Mixing Cup	Quantity
PT40000512	Sagola Cup Lid 400	400ml (14.08fl oz)	100
PT40000513	Sagola Cup Lid 650	650ml (22.9fl oz)	100
PT40000514	Sagola Cup Lid 1300	1.3 litres (45.8fl oz)	100
PT40000515	Sagola Cup Lid 2300	2.3 litres (80.9fl oz)	100

Sagola Paint Mixing Cup Dispenser

- Cup dispensers for paint mixing.
- Made of chromed aluminium.
- Bottom dispenser outlet for the mixing cup.
- Easy to access.
- Wall mounted and easy to install.
- Available for four sizes of Sagola mixing cups.

PART NUMBERS

Part Number	Description	Mixing Cup
PT40000517	Sagola Cup Dispenser 400	400ml (14.08fl oz)
PT40000518	Sagola Cup Dispenser 650	650ml (22.9fl oz)
PT40000519	Sagola Cup Dispenser 1300	1.3 litres (45.8fl oz)
PT40000520	Sagola Cup Dispenser 2300	2.3 litres (80.9fl oz)

Sagola Anti-Static Coveralls

Breathable panel in the back and underarms. Adjustable hood with elastic band and velcro. Press-buttons neck closure. Elastic ankle and wrist. 2-way zip and flap fitted with 2 breast pockets, 1 inside pocket, 2 side pockets and a hip pocket.

Original Dupont Teflon coating (water repellent and dirt-resistant). Silicone and lint free.

PART NUMBERS

Part Number	Description	Part Number	Description
PT40000525	Size M (46 - 48")	PT40000528	Size XXL (58 - 60")
PT40000526	Size L (50 - 52")	PT40000529	Size XXXL (62 - 64")
PT40000527	Size XL (54 - 56")
